Site Visited: March 6, 2006
Accredited: 3 years
2nd Site Visit Scheduled for: February 2011

Faculty: Ted L. Anderson, M.D., Ph.D.; Stacey Scheib, MD; Renee Ward, MD; Marta Crispens, MD; and John Lucas, MD

1-Year Program

Description: The fellowship program in Gynecologic Endoscopic Surgery at Vanderbilt University Medical Center is a one-year comprehensive program incorporating clinical, research, and educational activities. The fellow will benefit from a high surgical volume of five active surgeons whose collective focus includes a full spectrum of laparoscopic, hysteroscopic, and minimally invasive procedures including infertility, urogynecology, gynecologic oncology and general gynecology. Exposure to robotically-assisted laparoscopy is an integral component of our fellowship program.

Surgical experience will be obtained at Vanderbilt hospital, a free-standing ambulatory surgical center, and through office-based procedures. The fellow will participate in both resident-based gynecologic clinics and an active private gynecologic consultative service. Teaching activities will include resident instruction in endoscopic technique using an advanced skills laboratory and supervision of basic endoscopic procedures. Participation in departmental grand rounds, didactic educational programs, and weekly conferences is expected. A required research project may take advantage of the many clinical or basic research opportunities ongoing in the division or may be uniquely designed by the fellow with faculty supervision.

Upon completion of this program, the fellow will be competent in a full spectrum of endoscopic surgical techniques and qualified to serve as a consultant in minimally invasive gynecologic surgery in an academic or private setting.
