ADDITION OFFICE HYSTEROSCOPY TO YOUR PRACTICE

September 22, 2012
Newton-Wellesley Hospital
Boston, MA

Scientific Program Chair:
Keith B. Isaacson

ONLINE REGISTRATION BEGINS Friday, June 29, 2012 at www.aagl.org
Course Description
This comprehensive workshop is designed to cover all aspects of implementing hysteroscopy into your office practice. The format will consist of didactic lectures, live surgery demonstration and a hands-on laboratory.

At each workshop, a skilled hysteroscopist will instruct you in techniques and assist you in practicing skills to effectively add diagnostic and operative hysteroscopic procedures and adjunctive techniques to your in-office practice to meet the expectations of your patients and insurance carriers alike.

In addition, the boundaries of operative hysteroscopy, which are beyond the scope of the office, will also be presented.

The following will be covered:
- Indications and equipment for an office based hysteroscopy practice
- Techniques for in-office hysteroscopy, diagnostic and operative
- Managing your patient’s pain during in office procedures
- In office hysteroscopic sterilization
- In office endometrial ablation
- Fluid management and other potential concerns at time of in office hysteroscopy
- Advanced operative hysteroscopy

Objectives
At the conclusion of this course, the participant will be able to:
1. Provide hysteroscopic minimally invasive procedures in an office setting
2. Analyze the nuances that will allow office sterilizations and endometrial ablations to be successfully performed in the office
3. Improve hysteroscopic surgical techniques in the operating room
4. Describe the safety issues associated with two hysteroscopic procedures
5. Describe two different methods of providing analgesia to reduce discomfort at time of office hysteroscopy

Target Audience
This workshop has been developed for gynecologists who are expanding their office surgical practice to include hysteroscopic procedures and want practical knowledge and experience with equipment.
