

# The Fifth Joint Conference of COGA and AAGL on Minimally Invasive Gynecology

Primary spoken language in Chinese,  
with General session talks in English

Beijing, China  
December 6-10, 2017

**In Pursuit of Excellence Advanced Gynecologic Endoscopic Surgery**  
**The Fifth Joint Conference of COGA and AAGL on Minimally Invasive Gynecology**  
**Beijing, China**  
**December 6-10, 2017**

**Primary Language will be Chinese**  
**General Session Events and Presentations in English**

The 5th Annual joint meeting between the Chinese Obstetricians and Gynecologists Association (COGA) and the American Association of Gynecologic Laparoscopy (AAGL) will convene December 6-10, 2017, in beautiful Beijing, China, the ancient cultural center of civilization.

The goal of the conference is to provide the participants opportunity to 1) keep abreast of the state-of-the-art development in the field, and 2) pursue excellence in minimally invasive surgery that they may return to their patients with increased competence. The conference will present advanced gynecological endoscopic surgical techniques through didactic presentations as well as a full slate of live surgery demonstrations. Ample opportunity for practical application will be provided at the post-conference workshops through 25 hands-on training stations. Comprising the faculty are 30 of the top gynecologic minimally invasive surgeons from both China and the USA. "In Pursuit of Excellence," a historic collaborative conference between COGA and AAGL, appropriately held in the historic city of Beijing, promises to be a rewarding experience.

**Main Themes of the Meeting:**

Minimally Invasive Surgery for Gynecological Cancers. Deep Infiltrating Endometriosis (DIE)  
Pelvic Organ Prolapse and Incontinence. Difficult and Complicated Hysterectomy Live Cases Demonstrations.

**COGA President and Scientific Chair:** Professor JH Lang

**Scientific Committee :** ZhY Zhang, CY Liu, Franklin Loffer, L Zhu, JH Leng

**International Faculty:** C.Y. Liu, Arnaud Wattiez, Leila Adanya, Peter Mahr, Chyi Long Lee. Pamela Soleman, Rudy Campo, Marie Paraiso, Rudy Leon DeWilde XM Guan, Le Ming Shih. Felix Wong.

**Topics of the conference**

**Keynote Address**

Total of 8 Keynote Addresses covering all area of gynecological endoscopic surgery will be presented by internationally well known endoscopic surgeons every morning throughout the 4 days meeting.

**Live Surgery Demonstration**

At least 10 live surgery demonstration including straight stick and robotic surgery for Gyn. malignancies, severe endometriosis, difficult myomectomy, ovarian surgery and pelvic floor reconstruction will be presented during the meeting.

## **Other topics**

All aspect of hysteroscopic surgery and newly innovated hysteroscopic instrumentation. All aspect of benign and malignant laparoscopic and robotic surgery. Special sessions devoted to Gyn. malignancies, endometriosis, adenomyosis and myoma of uterus, pelvic organ prolapse and incontinence. Fertility preserving and promoting procedures

## **Hysteroscopy**

Current state of art in hysteroscopic surgery. Thirty years experiences in hysteroscopy.

Identification and prevention of severe complications in hysteroscopic surgery. Prevention and treatment of severe adhesions in uterine cavity.

## **Laparoscopy**

Laparoscopic treatment of deeply infiltrating endometriosis. Diagnosis and surgical treatment of intestinal endometriosis.

Principles of surgical techniques in preserving fertility in patient with adenomyosis. Prevention of urinary tract and bowel injury in complicated laparoscopic surgery. Application of Digital Medicine in applied anatomy of the female pelvic surgery.

Surgical management of childbearing women with POP.

Principles of surgical techniques and assessment of transvaginal radical hysterectomy in the treatment of cervical cancers.

Indication and advancement in laparoscopic radical hysterectomy

Surgical techniques and results of total laparoscopic radical trachelectomy in the treatment of cervical cancer

Appropriate use of energy sources in laparoscopic surgery. Laparoscopic treatment of tubo-ovarian malignancies.

Principles of laparoscopic assessment of retroperitoneal lymphadenectomy / Prevention of ureteral injury in laparoscopic surgery

Laparoscopic management of POP

## **Fetal Surgery**

Intra-uterine Fetal Endoscopic Surgery Management of Placenta Percreta

## **Robotic Surgery**

Robotic Assisted Cytoreductive Procedures for Ovarian Carcinoma

Robotic Assisted Radical Hysterectomy

Female Pelvis viewed through robot: Anatomy and Retroperitoneal Structures & Spaces

## **Live Surgery Demonstration**

Total laparoscopic hysterectomy

Laparoscopic surgery for deeply infiltrating endometriosis. Laparoscopic surgery of POP and pelvic anatomy

Surgical management of SUI Laparoscopic radical hysterectomy

Laparoscopic radical hysterectomy with bladder nerve sparing

Laparoscopic staging surgery for ovarian cancer

Laparoscopic Cytoreductive surgery for relapsed ovarian cancer Robotic assisted radical hysterectomy

Robotic assisted total hysterectomy

**Meeting Location**

Beijing Landmark Towers  
8NorthDongsanhuanRoad, Chao yang District, Beijing Nan Liu 13910029066

**Contact Person**
