	<input checked="" type="checkbox"/> Hysteroscopic Surgery	<input type="checkbox"/> Other:	

Description of Program:

This is a two-year fellowship that incorporates clinical, research, and teaching responsibilities at the University of Rochester Medical Center, Rochester, New York. It is best suited for candidates who wish to pursue an academic career and offers the potential of more time for research and academic development if desired.

The goal of the program is to develop our Fellows into skilled laparoscopic and hysteroscopic surgeons who can confidently tackle complicated pelvic surgeries including severe adhesive disease, advanced-stage endometriosis, complex myomectomies and congenital anomalies. Robot-assisted laparoscopic surgery is an integral part of the experience. The program has a focus on chronic pelvic pain, allowing the development of an area of sub-specialty interest for the graduate of the program.

The Scibetta Fellowship in Advanced Laparoscopic Surgery provides the Fellow with significant flexibility to develop expertise in minimally invasive surgery. The Fellow operates at least two days per week with the fellowship faculty. The Fellow will also rotate with our GYN Oncology, Urogynecology and Colorectal surgery services.

The Fellow gains office and teaching experience by seeing patients in the faculty practice, by supervising residents, seeing patients in the Chronic Pelvic Pain Clinic (with supervision by Drs. Benjamin and Gubbels). The Fellow spends at least one day per week seeing patients in the office.

The Fellow is expected to conduct IRB approved research during their fellowship and mentorship is provided to accomplish that goal. Typically, the Fellow manages to have video, oral and poster presentations at AAGL annual meetings.

The Fellow has teaching responsibilities as they relate to the education of our 32 OBGYN residents as well as medical students in the clinics, operating room, on the floors and in the simulation center. The Fellow has an appointment as a Clinical Instructor and serves as a junior attending with intermittent service and call responsibilities.

The Fellow is encouraged to attend the various courses offered by the AAGL and is provided support to attend AAGL and other national meetings.

The Department of Obstetrics and Gynecology is a vibrant and congenial department that affords the Fellow a wide variety of academic, clinical, and social opportunities. It serves as a major tertiary center in Western New York for complex obstetric and gynecologic patients, providing a wealth of clinical experiences.
