JOHNS HOPKINS HOSPITAL BALTIMORE, MARYLAND

Accreditation Period: 2018-2020

KAREN C. WANG, M.D.
Program Director

KRISTIN PATZKOWSKY, M.D.
Associate Program Director

2-YEAR PROGRAM

Description

Johns Hopkins Hospital is one of the nation's top academic teaching hospitals and is affiliated with Johns Hopkins School of Medicine. The department of Gynecology and Obstetrics offers a multitude of highly competitive fellowship programs in addition to a coveted resident training program. Resources available to a strong candidate include a high volume of complex gynecologic patients with benign disease who would benefit from a minimally invasive approach that requires advanced technical skills, a wide range of education and research activities, and opportunities for cross-disciplinary collaborations both nationally and internationally.

Our primary goal is to train excellent MIGS surgeons, clinicians, and academicians who will become leaders in our field. The fellow will rotate at both Johns Hopkins Hospital and Bayview Medical Center with exposure to a variety of advanced operative hysteroscopy, office procedures, vaginal and laparoscopic approaches including single incision, conventional, and robot assisted approaches to manage complex diseases such as adnexal masses, fibroids, abnormal uterine bleeding and

endometriosis. The experience will include exposure to Gynecologic Oncology procedures, Urogynecologic procedures, Reproductive Endocrinology and infertility, and fetal surgery.

Fellows will have access to our simulation lab Minimally Invasive Surgical Training and Innovation Center (MISTIC) and participate in both inanimate and animate workshops for medical students, residents, and faculty as both a participant and educator. Additional educational opportunities include Grand Rounds, M&M Conference, preoperative conference, journal clubs, and quality improvement and patient safety meetings.

An exciting unique resource is with John Hopkins Medicine's global affiliate JHPIEGO (John Hopkins Program in International Education in Gynecology and Obstetrics). Developed over forty years ago with the mission to improve healthcare in low and middle income countries, and established infrastructure exists that would facilitate international collaborations, projects, and experiences for our fellow. JHPIEGO was a pioneer in minimally invasive surgery in the 1970's-introducing laparoscopic tubal ligations for areas of need. There will be opportunities for the fellow to collaborate with JHPIEGO in projects involving minimally invasive surgery.
