President’s Corner

We’re three months in, and I’m proud to report a great deal of work has already been accomplished by your 2018 FMIGS Board and its committees. First of all, I want to thank the AAGL for inviting me and Dr. Shanti Mohling as representatives of the fellows, to participate on the Task Force for Anti-Harassment, Diversity, and Incident Reporting. The new policies can be found on the AAGL website. The FMIGS Grievance Committee will now roll under the newly formed AAGL Grievance Committee chaired by Dr. Barbara S. Levy. On a similar theme, our board approved organizing FMIGS as a professional interest partner of the AAGL, formalizing a long and fruitful relationship with our parent organization.

Our Liaison Committee continues its work on establishing MIGS with an ABOG Focused Practice Designation, now with a proposed timeline of within the year. Our Site Review and Compliance Committee continues to do excellent work monitoring our existing programs and evaluating new ones. Our Education Committee has proposed a curriculum for this year’s Boot Camp and also worked on developing an outstanding Fellow’s course at the Global Congress. This year’s Boot Camp will be held at Barrow Neurological Institute, St. Joseph’s Hospital and Medical Center in Phoenix, Arizona, August 18-19, 2018. Our Curriculum Standardization committee has begun the process of its two-year cycle review.

At our in-person meeting last month, the Board approved a recommendation by the Assessment and Case Review Committees to re-vamp the case log system to more accurately and easily capture fellow cases. Our Young Alumni Network Committee has elected its members, created a mentorship program, and is helping to plan this year’s graduation ceremony at the Global Congress. The FPRN continues to be very active, presented its current work at a productive in-person meeting at the SGS meeting in Orlando. I am continually impressed by the Communications Committee and the quality of these newsletters. Many thanks to all of our Board and committee members and their hard work. It’s been a great year so far and I look forward to the months ahead!
The FMIGS Young Alumni Network continues to be very active and I am pleased to report on the progress that has been made. Our second in-person meeting was held during the SGS Annual Meeting and highlighted Dr. Samar Nahas. Dr. Nahas inspired all in attendance by openly sharing her academic and personal journey. If you missed her speech or want to watch it again, you can find it on the FMIGS At Large Facebook Page.

Out FMIGS Mentor/Mentee program is also in full swing with a total of 58 FMIGS fellows being matched with FMIGS Young Alumni Network Members. Thank you to Vicky Vargas (FMIGS 2016) and Sara Farag (FMIGS 2018) for making this program a success! If you didn’t get matched, don’t worry. The match will be repeated again next fall in anticipation of the 2018 AAGL Global Congress.

A message board specifically for the Young Alumni Network has also been created. This has given us a platform to discuss issues directly related to members of our group. All Young Alumni Network members should have received an invitation to join. If you did not, please contact myself or Frank Aguirre (webmaster) or me for an invite.

Looking to the future, we are currently planning the FMIGS Graduation, and will be assisting with abstract review for the AAGL Global Congress. We look forward to our next in person meeting at the 2018 AAGL Global Congress. More details to follow!

As a reminder, the Young Alumni Network committee leaders include Ade Oshinowo (Co-Chair), Jim Casey (Class of 2017 Representative), Vicky Vargas (Class of 2016 Representative), Amanda Ecker (Class of 2015 Representative), Nima Patel (Class of 2014 Representative), Suzanne Fenske (Class of 2013 Representative), and Noah Rindos (FMIGS Board Representative). Please reach out to me, or any of the committee leaders, if you have any questions or suggestions for the Young Alumni Network.

See you in Las Vegas!

Megan N. Wasson, DO
Chair, FMIGS Young Alumni Network Committee

---

**Fellows’ Corner**

Congratulations to the second year fellows on nearly completing the end of their training and to the first year fellows on reaching the half way mark! For the first years, this is a great time to reach out to your incoming new fellows to make sure they have found a place to live, start to orient them to any information that you think they should know about the program or city and plant some seeds about possible research ideas. Second years, make the most of the next few months before you complete your training to revisit any skills that you may need for your new job, make sure that you have started getting your medical license in order and finish up any research or outstanding projects before you leave.

The position of the Fellow’s Representative to the FMIGS Board will begin accepting nominations on July 15th. You may nominate yourself or another person that you think would be a good representative for the FMIGS Fellows. It is a two year position that starts on January 1st 2019 and involves a monthly phone call as well as two in person meetings per year. The position is open to members of the graduating class of 2017 and 2018. Additionally you will serve as the FMIGS Board liaison to the Young Alumni Network. In order to apply, you will be asked to provide a current copy of your CV and a vision statement of the goals for your time on the board that describes why you think you would be a good fit for the position. Stay posted for more details and information in the next few months.

On a final note, please let me know if there is ever anything that I can do to make your experience with fellowship better. I am happy to talk to you if you are having a hard time, if you are trying to figure out the job search process or just want to check in.

All my best,

Noah Rindos, MD
Faculty at Magee Women’s Hospital
With the daily barrage of horrifying images of the Syrian civil war, I constantly found myself asking, "What can I do?". I decided to act when the opportunity arose and traveled to the Zaatari refugee camp in Jordan. It is the 2nd largest refugee camp in the world- home to nearly 80,000 refugees. Being in fellowship and having a young daughter at home, I had tons of fear and reservations, but I ultimately followed my heart and went in January of 2017. It was a life-changing experience for which I am eternally grateful. The challenge of refugee medicine is the lack of resources and sustainability of health care. Despite having developed a variety of skills during my training, I felt limited by the infrastructure and local politics. For example, I saw a 30-year-old woman who was 8 weeks pregnant and had signs of invasive breast cancer. The organization I went with paid for her diagnostic testing, but we had no way of following-up or finding her amongst the thousands of people in the camp, which was devastating. Nonetheless, every day was a gift and we were able to impact the refugees' lives in meaningful ways.

After my experience in Jordan, I took my skills to Bangladesh in October of 2017 to do a needs assessment and help develop a program to help the Rohingya refugees. In collaboration with a local NGO, we were able to build a clinic that now sees roughly 200 patients a day. During my time there, thousands of people were still actively fleeing persecution and mass murder at the hands of the Myanmar military on a daily basis. I heard countless stories of rape and children being pried from their mothers' arms and brutally murdered. I had never heard of such horrible atrocities before in my life. I couldn't help but reflect upon the fact that we as physicians have a unique opportunity to help serve humanity in a way that most cannot. Here in the United States, as much as we love what we do, the unfortunate reality is that we are often bogged down by hospital politics, medical malpractice, and a patient culture that is less trusting of our expertise and more trusting of Google. I know I am not alone when I have felt jaded by our system and our culture. In refugee medicine, however, it is just you and the patient. It pushes you to think outside of the box and solve problems that we do not typically encounter. Helping the underserved puts your own life in perspective. It shows you how resilient and amazing the human spirit can be in times of unimaginable tribulation. It makes you connect with people who may not speak the same language or share the same culture, but who are so immensely grateful that you are there to help them achieve health and survive through the worst humanitarian crisis of our time. For me, it restored my faith in medicine and in humanity.

My dream is to ultimately bring minimally invasive surgery to refugee populations and to low-to-middle income countries. We are currently a long way from that, but the 1st step in accomplishing anything great is to imagine it, and I believe that one day we will get there! I am humbled and honored to be a part of the AAGL MIGS community which is revolutionizing care for patients globally, and impacts the world in a positive way.

Ambareen G. Jan, MD completed her fellowship in 2017 at the University of Louisville and currently is employed at Lahey Hospital in Massachusetts.
FPRN Update

The FMIGS/SGS subgroup of the Fellows’ Pelvic Research Network (FPRN)® continues to grow! We had an unprecedented number of proposal submissions and nominations for fellows to serve as the 2018-2019 FMIGS- SGS Steering Committee (SCM). Fellows will receive an email invitation this April to vote for the new SCM and are encouraged to vote!

Please visit the FMIGS- SGS FPRN website to learn more about the FPRN and consider joining one of the new studies! Fellows that participate in studies serve as coauthor. http://www.sgsonline.org/fprn

There are currently five ongoing FPRN studies with two well underway with patient enrollment. Dr. Carolyn Piszczek is leading a study evaluating the use of social media in women with pelvic pain and Dr. Jessica Sisto is assessing sexual function and satisfaction after hysterectomy in women who have sex with women.

The three new FPRN studies that are actively recruiting fellows to serve as a participating site and coauthor are detailed below. If you’re not a FMIGS fellow but you’re interested in serving as participating site and coauthor, you may be eligible and you’re encouraged to contact the principle investigator of the study.

Dr. Nisse Clark is investigating outcomes of Essure removal for the treatment of device-attributed symptoms and Dr. Cynthia Arvizo is evaluating treatment outcomes after uterine artery embolization for management of uterine arteriovenous malformation. Dr. Patricia Mattingly is examining the impact of FMIGS training on myomectomy route and outcomes. Fellows that participate in the myomectomy study have the opportunity to serve as a lead investigator and first author for an ancillary study that utilizes the data bank.

The next opportunity to submit a proposal will be this fall for consideration at the 2018 AAGL Global Congress. We want to thank all of you for making this new chapter a success! The FPRN would not be possible without the mentorship from our senior advisory board and the support and funding provided by SGS and AAGL.

Chair: Patty Mattingly - patriciamattingly@gmail.com
Secretary: Nisse Clark - nvclark@gmail.com
Treasurer: Laura Matthews Glaser - lauramathews85@gmail.com
Webmaster: Leigh Rosen - leigh.rosen@gmail.com

Fellows at FPRN meeting at 2017 AAGL Global Congress
The myTIPreport online assessment platform has now been released to all fellowship sites. Please email me (CaraRobinsonKing@gmail.com) if you have any concerns regarding access, and I will get you up and running ASAP. The FMIGS specific milestones have been built into the app, so take a moment to review those as well. The goal is for 5 evaluations per week!! Keep a look out for monthly competitions. Prizes will be awarded to the programs with the highest number of evaluation submissions!!

### Graduation 2018

**Save the Date** for this year’s 2018 Fellowship Graduation!
The graduation will be held Sunday, November 11, 2018 from 4:30 pm-5:30 pm with cocktails to follow. There will then be time for individual group dinners after.

### Fellowship Director’s Corner

Great news for Spring – and for fellows and PDs - The Case Log System will be improved! More details to follow. MyTipReport is live now (see Cara’s notes above) and the FMIGS Milestones are incorporated into these evaluations. Your evaluations will be merged with the current fellow evaluation forms distributed every 6 months to help identify areas requiring added instruction and/or advancement.

Please note there are changes to the application process this year. Applications are due June 15, 2018 and will be delivered via on-line access to all programs on June 18, 2018. So programs will get all applications at one time, June 18! Any late applications will be handled on a 1:1 basis with the Fellowship office and individual programs.

**Friendly Reminder:** Our next on-line PD meeting is scheduled for May 7, 2018, at 7:30PM EST. Please find the link in your email dated April 4, 2018 from Arcy and click to confirm your participation and to submit topics for discussion.
MIGS Job Openings

CW Bill Young (Bay Pines) VA Health Care System seeks BC/BE gynecologist for a permanent, full-time (1.0 FTE/40 hours/wk) gynecology-only position. This person will serve as the service chief. Candidate must have an active license to practice gynecology. Selectee will perform the full range of gynecologic office and OR procedures.

Bay Pines VA Healthcare System (VAHCS) serves the healthcare needs of America’s Veterans in West Central and Southwestern coastal Florida by providing primary care, specialized care, and related medical and social support sources. Bay Pines is a complexity level 1a facility providing comprehensive healthcare to more than 100,000 Veterans.

**Duties will include but are not limited to:**
- Provide direct patient care for gynecologic problems (seeing outpatients & inpatients)
- Perform in-office procedures
- Perform in-OR surgeries
- Oversee staff gynecologist(s)
- Train residents/other healthcare learners
- Share home-based after-hours call

**Types of in-OR surgeries include:**
- Cold knife conization
- Diagnostic and operative hysteroscopy
- Diagnostic and operative laparoscopy
- Hysterectomy (laparoscopic, vaginal and open)
- Pelvic organ prolapse procedures (A&P repairs, sacrospinous ligament suspension, sacrocolpopexy)
- Incontinence procedures (TVT or TOT)
- Robotics experience preferred, but not required.

The ideal candidate enjoys working in a collegial atmosphere and has experience growing gynecologic services in a universal healthcare setting. In addition, we are looking for someone who is sensitive to the unique healthcare needs of female veterans, has an interest in training residents/other healthcare learners and contributing to or supporting women’s health clinical research.

Our aim is to cultivate strong relationships with our local academic and community partners. Having an academic affiliation or interest in building a gynecologic surgery residency training program is a plus. As not all women’s health services are presently available in the VA system, we are looking for someone who can help facilitate community care (particularly in the areas of maternity, gynecologic oncology and assisted reproductive technologies care)

Our medical center is located on 337 acres situated on the Gulf of Mexico. The first building was constructed in 1933. The healthcare system serves a 10-county area from Pinellas County in the north to Collier County in the south. In addition to our main facility at Bay Pines, we offer services in one large outpatient clinic (Lee County) and 7 community-based outpatient clinics (CBOCs). These CBOCs are located in Bradenton, Naples, Palm Harbor, Port Charlotte, St. Petersburg, Sarasota and Sebring. We seek a person who is willing to travel, as we hope to expand services to some of our more active satellite clinics. [Click](#) to apply.

**Program Director, OB/GYN Residency**

Build Our New ACGME-Accredited OB/Gyn Program

Anne Arundel Medical Center is advancing the future of health care for over one million people in the Annapolis, Maryland, metro region. As we expand to meet growing needs, and focus on the goal of improving population health, we seek a dynamic physician leader to join us in a unique position as Program Director, OB/Gyn The Program Director position will require half-time dedication to the administrative and educational activities of the OB/Gyn Residency Program, in addition to other clinical responsibilities as appropriate for experience and training. This is an exciting opportunity to oversee the application for and strategic implementation of a new ACGME-accredited OB/Gyn program. Areas of accountability include: • Building and implementing all aspects of an ACGME-accredited OB/Gyn residency program. • Working with leadership to integrate residents into institutional and departmental clinical operations • Creating and supervising research activities of residents Our successful candidate will be a proven clinician and leader with at least 5 years of clinical experience in obstetrics or gynecology after completion of a residency in obstetrics and gynecology, as well as requisite specialty expertise and documented educational and administrative experience. Candidates must also be board certified in OB/Gyn, practice in any branch of OB/Gyn or its subspecialties, and ultimately qualify for licensure in the State of Maryland. Candidates must demonstrate scholarly interests via current/previous published work or professional contributions. Salary and benefits are competitive and include 403[b] and 457[b]. Anne Arundel Medical Center is ideally situated in the center of American history, within easy reach of the Chesapeake Bay, Washington, D.C., Baltimore and the famous Ocean City boardwalk. Our campus is just as welcoming with a progressive atmosphere that promotes collegiality, collaboration and customer service. For details and personal consideration, please direct your curriculum vitae to Lmorrison@aahs.org.
Established OB/GYN Surgical Practice Recruiting for AAGL Fellows!

Located in the Minneapolis, Minnesota metro area, Oakdale Ob/Gyn (oakdaleobgyn.com) is seeking a fulltime ObGyn with excellent clinical and surgical skills to join its team. As the largest independent ObGyn practice in the Twin Cities, this progressive 65-year-old practice offers a complete continuum of women’s health. Practice features include a unique mix of urogynecology, endometriosis management, and complex surgical cases. It is interested in growing its GYN surgical team. Ideal candidates for this superb position will be trained in minimally invasive gynecologic surgery, AAGL fellowship trained preferred, board certified/eligible (BC/BE). Practice details include:

- Integrated team includes 11 board-certified ObGyn physicians, 6 nurse midwives, 5 nurse practitioners, an ObGyn physical therapist, and a registered dietician who see patients of all ages at 4 metro area clinics.
- 4 day work week; 4-6 weeks PTO, negotiable based on candidate
- Competitive salary and benefits, and reimbursed continuing medical education
- Benefits: health, dental, life, STD, LTD, long-term care, and an HSA plan
- Retirement: maximum qualified retirement plan dollars available by law annually
- Malpractice insurance: Midwest Medical Insurance Company (MN based carrier) with $4mil/$6mil limits, and an additional $10mil umbrella coverage.
- Call schedule: 3.5 days on call per month
- Affiliated with Maple Grove Hospital, North Memorial Health Hospital, and two ambulatory surgery centers in Maple Grove and Blaine, respectively.
- Labor and delivery at Maple Grove Hospital, the 2nd busiest delivery hospital in the state
- Innovative specialty care programs: GYN surgery with and without robotics, the Center for Urinary and Pelvic Health, a Menopause Clinic, and an Infertility Evaluation and Treatment program.

Full-time Gynecologic Surgeon

The General Division of Obstetrics and Gynecology seeks an outstanding gynecologic surgeon for a full-time position. Ideal candidates are board certified or eligible physicians with fellowship training in minimally invasive surgery or equivalent experience who are interested in an academic career. The General Division has four general Ob/Gyn faculty practice sites with recent addition of a new site focused on gynecologic services at Ohio State University Hospital East. Faculty members also work at the multidisciplinary Center for Women’s Health. Outpatient clinical services for this position will be at the Carepoint East outpatient facility and the Center for Women’s Health with the intent to expand the availability of gynecologic consultation at both locations. The position is expected to be split 60% at the East location and 40% at the Center for Women’s Health.

In addition to an active faculty practice, members of the General Division supervise resident clinics, the gynecology teaching service, and provide in hospital gynecologic consultation. Additionally, they have an active role in medical student education. Current faculty includes two specialists in minimally invasive surgery. Other faculty expertise includes ultrasound, family planning, vulvar disease, menopause, sexual health, pediatric gynecology, and breastfeeding.

Requirements include: M.D./ D.O. degree required; successful completion of accredited residency training program required; current licensure or interim permit to practice medicine from the State of Ohio Medical Board required; current registration with DEA (Drug Enforcement Administration); board certification or eligibility by the American Board of Obstetrics and Gynecology, ability to be successfully credentialed at the Medical Center and with the self insurance fund.

Additional information regarding the Department of Obstetrics and Gynecology can be found at: https://wexnermedical.osu.edu/departments/obstetrics-gynecology/team

Interested candidates should send a cover letter expressing their academic interests and a copy of their curriculum vitae to:

Lisa Keder, MD, MPH
Professor and Vice Chair
Lisa.Keder@osumc.edu
THE NATIONAL INSTITUTES OF HEALTH (NIH) IS LOOKING FOR EXTRAMURAL MEDICAL OFFICERS!

The Gynecologic Health and Disease branch of NICHD at the NIH is recruiting for a medical officer to guide and build the gynecologic pain grant portfolio for the agency. The position would also be responsible for outreach to the NIH pain consortium and to pain research professional societies and advocacy organizations. Extramural Medical Officers develop research initiatives in their field of expertise, administer extramural research grants, evaluate activities of funded investigators, and make recommendations regarding the contribution of the research to the goals and objectives of the program. This position is stationed in Bethesda, MD and pay is based on the General Schedule (GS) for civil service pay GS13/14 (pay scales can be found HERE: https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/18Tables/html/DCB.aspx). There are opportunities to continue medical practice, but these would not be official parts of the position. Research experience is a plus, but not a must. Board certification in obstetrics and gynecology or a relevant clinical field is highly desirable.

Several other branches at NICHD/NIH will be recruiting from this same job posting. These include (Pediatric Trauma and Critical Illness (PTCIB), Intellectual and Developmental Disabilities (IDDB), Pregnancy and Perinatology (PPB), Contraception Research (CRB), and the Office of the Director, Division of Extramural Research. For these positions, NICHD/NIH seeks Physicians (MDs) with board certification in obstetrics and gynecology (including maternal-fetal medicine subspecialty certification), pediatrics, clinical genetics and genomics, or family medicine to serve as extramural medical officers.

The NIH is scheduled to post this position on USAjobs.gov on Friday, April 12, 2018 and only until Monday, April 16, 2018. To apply for this position please visit www.USAjobs.gov

For more information about the branches, please visit https://www.nichd.nih.gov/about/org/der.

For more information about this position, please contact:
Lisa Halvorson, MD

Minimally Invasive Gynecologic Surgeon

The Department of Obstetrics and Gynecology at St. Luke’s University Health Network is undergoing an exciting expansion to fulfill the rapidly growing demands associated with our increasing clinical volumes and academic pursuits including medical student, resident and fellows’ education as well as clinical research.

We are currently seeking physicians in the following areas: Minimally Invasive Gynecologic Surgery, Gynecologic Oncology

Successful candidates will have an MD, MD/PhD or DO degree, be board certified or board eligible in the respective specialty/sub-specialty and possess a strong commitment to provide outstanding patient care and a passion for teaching and/or clinical research.

These positions will offer outstanding compensation packages commensurate with prior experience and track records, potential leadership opportunities for qualified candidates and adjunct academic clinical appointments at the Clinical Assistant/Associate Professor level through the Lewis Katz School of Medicine at Temple University.

Our system started the first robotic surgery program in Pennsylvania. We have an AAGL approved fellowship in Minimally Invasive Gynecologic Surgery and our organization was the first recipient of the COEMIG designation in the State of Pennsylvania.

If interested apply here: Practice At St. Luke’s
Gynecologist with Interest in Surgical Education

The Department of Obstetrics and Gynecology and Harvard Medical Faculty Physicians at Beth Israel Deaconess Medical Center in Boston is seeking a full-time Academic Gynecologist with an interest in surgical education. The ideal candidate will demonstrate a history of leadership, activity and commitment to surgical teaching, curriculum development and assessment for OBGYN trainees as well as surgical development of attending obstetrician gynecologists for maintenance of surgical skills and professional development. The clinical practice will be located at the main tertiary care campus in Boston, MA.

Salary and academic appointment at the Instructor, Assistant Professor or Associate Professor level at Harvard Medical School will be commensurate with experience and qualifications.

Address inquiries to: Christopher Awtrey MD, Vice Chair Gynecology, Department of Obstetrics and Gynecology, Beth Israel Deaconess Medical Center, Attn: Riki MacKillop, Manager, 330 Brookline Avenue, KS3, Boston, MA 02215 or email: rmackill@bidmc.harvard.edu

Requirements:
Candidates must be BC/BE in Obstetrics and Gynecology.

Physician (Gynecologist) Department of Veterans Affairs

The Oklahoma City VA Healthcare System Ambulatory Care Service is recruiting a full-time Gynecologist. The Oklahoma City VA Healthcare system is an active teaching hospital affiliated with the University of Oklahoma Health Sciences Center in Oklahoma City. The Physician is accountable to the Chief, Ambulatory Care and is responsible for duties that include, but are not limited to:

Participates in and/or manages all aspects of gynecologic patients to include surgical, inpatient care, and outpatient clinical visits;

Provides direct patient care, oversees residents by providing clinical instruction in the outpatient clinic and inpatient settings.

Attends, participates, and supervises residents and/or medical students in outpatient clinics and the performance of any procedure whether in the operating room or at the bedside appropriate to their level of graduate responsibility.

Takes an active role in the evaluation of the patient, decision for treatment/care, and documentation in the patient electronic records.

Conducts special procedures such as; exploratory laparotomy, exploratory and lysis adhesions, and hysterectomy (all types)

Qualifications for the position include 1) US citizenship; 2) Degree of doctor of medicine or an equivalent degree resulting from a course of education in medicine or osteopathic medicine. The degree must have been obtained from one of the schools approved by the Department of Veterans Affairs for the year in which the course of study was completed; 3) Current, full and unrestricted license to practice medicine or surgery in a State, Territory, or Commonwealth of the United States, or in the District of Columbia; 4) Completion of residency training, or its equivalent, approved by the Secretary of Veterans Affairs in an accredited core specialty training program leading to eligibility for board certification; and 5) Proficiency in spoken and written English

The salary range for the position is $100,957 to $348,000 per year commensurate on experience. Preferred applicants are Board Certified by ABOG or on the pathway to Board Certification, have completed a fully accredited US residency program, and those with prior academic experience.

Interested applicants can contact Dr. Karl Hansen at Karl-Hansen@ouhsc.edu
Call for Nominations to all the AAGL Membership: July 15, 2018/Closing: August 15, 2018

FELLOW BOARD REPRESENTATIVE
All elected Fellow Board Representative shall serve for a one two-year term. The term of office shall commence on January 1st of the subsequent year. All nominees will be required to provide a current CV, a one paragraph Vision Statement that includes their goals and why they believe that they are ideal for this position.

ELIGIBILITY
Eligible nominees for Fellow Board Representative must be FMIGS graduates who have finished their training in 2017 or 2018, are not currently serving on the Board, and have never served as an Officer of the FMIGS Board.

INELIGIBILITY
Nominees who have not graduated from a FMIGS program are not eligible to participate.

NOMINATION PROCESS
Self nomination or nominated by others.

Please let me know if you need any additional information.
