Accreditation Period: July 2018-June 2022

JIN HEE (JEANNIE) KIM, M.D.
Program Director

ARNOLD P. ADVINCULA, M.D.
Associate Program Director

Faculty:

Jin Hee Kim, M.D., Arnold Advincula, M.D., Douglas N. Brown, MD, Hye-Chun Hur, MD, MPH, Beth Rackow, M.D., Timothy Ryntz, MD

1-YEAR RESEARCH + 2-YEAR CLINICAL FELLOWSHIP PROGRAM

Description: The Columbia University MIGS fellowship is a 3-year fellowship program that provides unique educational opportunities for fellows. The program is comprised of a dedicated research year, in Year 1, followed by two clinical-focused years in Year 2 and 3. During the research year, fellows will participate in the design and conduct of cutting edge clinical and laboratory research that focuses on surgical techniques, outcomes, education and training. Fellows will have access to the state of the art Mary and Michael Jaharis Simulation Center in the new Roy and Diana Vagelos Center, which is dedicated to advanced training and simulation based medical education. Dr Arnold Advincula is the Executive Medical Director of the simulation center.

During the span of 2 clinical years, trainees will be exposed to a large volume of simple and advanced surgical cases in benign gynecology, reproductive infertility and urogynecology under close faculty supervision. The program provides a balanced experience in hysteroscopy, vaginal, laparoscopic and robotic procedures. The strength of the program lies in the number of faculty that fellows work with

directly and the significant clinical volume with a high number of complex surgical cases. Fellows will function as Junior Attending and will carry teaching responsibilities in the residency program.

Fellows will have access to simulation labs with pelvic trainers and will participate in inanimate and animate workshops as both faculty and learner. Extensive educational sessions with multiple weekly conferences provide a vigorous learning and teaching experience. Educational opportunities include M&M conference, grand rounds, preoperative conference, MIGS core didactic series, journal clubs, and quality assurance meetings.

Additionally, fellows will be required to participate in an intensive Biostatistics & Epidemiology course hosted by Professor Cande V. Ananth of the Mailman School of Public Health at Columbia University. Fellows will have the opportunity to attend an Excellence in Clinical Research Course offered by The Foundation of Excellence in Women's Health. There will be additional opportunities for fellows to audit courses in biostatistics and any relevant statistical computing courses at the Mailman School of Public Health at Columbia University. Fellows are required to complete a research study with a submission-ready manuscript to a peer-reviewed Journal by the end of the 3-year program.
