Fellowship in Minimally Invasive Gynecologic Surgery

Effective July 1, 2019

***PROGRAM REQUIREMENTS FOR
FELLOWSHIP IN MINIMALLY INVASIVE GYNECOLOGIC SURGERY***

64 **REQUIREMENTS FOR A POST-GRADUATE FELLOWSHIP IN THE SUBSPECIALTY AREA OF**
65 **MINIMALLY INVASIVE GYNECOLOGIC SURGERY**

66

67 **A. Introduction**

68 Fellowships in Minimally Invasive Gynecologic Surgery (FMIGS) are intensive
69 training programs preparing the graduate for advanced minimally invasive
70 gynecologic surgery (MIGS) expertise. The FMIGS Board is a Professional Interest
71 Partner under the auspices of the AAGL and accredits all FMIGS programs.

72

73 **B. Mission**

74 The mission of the fellowship is to provide a uniform training program for
75 gynecologists who have completed residency in obstetrics and gynecology and
76 desire to acquire additional knowledge and surgical skills in minimally invasive
77 gynecologic surgery (MIGS) so they may: serve as a scholarly and surgical resource
78 for patients and referring physicians; have the ability to care for patients with
79 complex gynecologic surgical disease via minimally invasive techniques; establish
80 sites that will serve a leadership role in advanced endoscopic and reproductive
81 surgery; and further research in minimally invasive gynecologic surgery.

82

83 **C. Goals**

84 The overall goal of the fellowship is for the graduate to serve as an independent
85 specialist and consultant in the surgical management and techniques of advanced
86 benign minimally invasive gynecology at a level surpassing competence expected
87 by completion of a categorical residency.

88

89 **D. Fellowship Training Program Requirements**

90 The MIGS Fellowship consists of a minimum of two years of continuous education,
91 training, and research following completion of an obstetrics and gynecology
92 residency.

93

94 **1. Fellowship Program Director**

95 The fellowship director is ultimately responsible for the design and
96 implementation of the fellowship-training program.

97

98 There must be a single fellowship director with authority and accountability
99 for the operation of the program. The sponsoring institution (e.g. Designated

100 Institutional Official, department chairperson) and the FMIGS Board must
 101 approve the fellowship director.

102 1. The fellowship director must commit to his/her position for a length
 103 of time adequate to maintain continuity of leadership and program
 104 stability.

105

106 The fellowship director must:

- 107 1. Have surgical training and clinical experience
- 108 2. Have documented scholarly expertise in MIGS by:
- 109 1. publication of at least one original research or review article in a
 110 peer-reviewed journal within the past two years and at least of two
 111 of the three items within the past two years:
- 112 a. peer-reviewed funding
- 113 b. presentation at regional or national professional and
 114 scientific society meetings
- 115 c. serve as a reviewer for a major journal
- 116 3. Have educational and administrative experience
- 117 4. Maintain current certification by the American Board of Obstetrics and
 118 Gynecology or be a current Fellow of the Royal College of Surgeons in
 119 Canada
- 120 5. Have completed a fellowship in MIGS, Gynecologic Oncology (GO), Female
 121 Pelvic Medicine and Reconstructive Surgery (FPMRS) or Reproductive
 122 Endocrinology and Infertility (REI) for any new or incoming fellowship
 123 director
- 124 6. Have current medical licensure and appropriate medical staff appointment
- 125 7. Have a minimum of 4 years' independent practice post-fellowship
 126 experience
- 127 8. Directly supervise the education and mentoring of fellows to ensure that
 128 they receive the appropriate clinical instruction and training to provide
 129 safe patient care
- 130 9. Ensure that each fellow completes the research requirements by assigning
 131 a research mentor and monitoring compliance
- 132 10. Evaluate and document the fellow's performance as described below
- 133 11. File an Annual Report with the FMIGS Board
- 134 12. Respond in a timely fashion (within ten days) to any inquiry made by the
 135 FMIGS Board or Site Review and Compliance committee
- 136 13. Be an active member of the AAGL and in good standing

137

138 The fellowship director must identify at minimum one Associate Program Director
139 with defined responsibilities that includes acting on behalf of the fellowship
140 director if he/she is not available. If the fellowship director and Associate Program
141 Director(s) are not able to provide training oversight, it will be the responsibility
142 of the sponsoring institution or department to identify a qualified fellowship
143 director who is available and willing to provide the fellow with the required
144 training. Fellowship programs can identify additional Associate Program Directors
145 for oversight at additional training sites (see below).

146

147

148

149 ***Fellowship Director Changes***

150 The FMIGS Board must approve a change in fellowship director. A letter must be
151 sent electronically to the FMIGS office (within 30 days) and indicate the
152 resignation of the fellowship director and the appointment of an interim
153 fellowship director until the matter has been considered by the Board. The Board
154 reserves the right to require additional information and/or site visit.

155

156 **2. Core Faculty**

157 There must be adequate faculty with special interest, expertise, and scholarly
158 activity related to MIGS that participate in the care of patients and the
159 education of fellows.

160

161 **3. Facilities**

162 1. All MIGS fellowships (with the exception of military programs) must be
163 affiliated with an accredited training program(s) as required by the
164 National Resident Matching Program (NRMP; www.nrmp.org). The
165 educational program must be sponsored by an ACGME-accredited
166 institution or participating site.

167 2. The primary hospital facilities must be equipped to provide state-of-the-
168 art inpatient and outpatient MIGS experiences. Office and ambulatory
169 care facilities must also be appropriately equipped including office
170 hysteroscopy.

171 3. Clinical information systems or libraries and/or online information
172 systems, including those relevant to the subspecialty, must be readily

173 available as resources for patient care and clinical research at the host
174 institution.

175 4. A breadth of skills and simulation training must be integrated into
176 fellowship instruction.

177 5. Research support must be available.

178 6. Animal and cadaver training experiences are desirable.

179 7. A program may utilize more than one patient–care facility. If more than
180 one site is used, there must be a Program Letter of Agreement (PLA) with
181 the ancillary site(s) and appropriate faculty, updated every 5 years. An
182 Associate Program Director may be designated to oversee fellow training
183 at each ancillary site. The ancillary site(s) will receive the same approval
184 period accredited to the program unless there are changes to the ancillary
185 site.

186 The Program Letter of Agreement (PLA) must:

187 A) Identify the faculty and possibly Associate Program Director who will
188 assume both educational and supervisory responsibilities for fellows

189 B) Specify responsibilities of the above faculty for teaching, supervision, and
190 formal evaluation of fellows

191 C) Specify the duration and content of the educational experience

192 D) Specify the fellow’s responsibilities at the ancillary institution.

193

194 **E. Educational Objectives**

195 All Educational Objectives (<https://bit.ly/2IsqtLZ>) are directed toward the
196 standardization of training in minimally invasive gynecologic surgery. These
197 objectives must be addressed in a structured and systematic manner during the
198 training period. The fellowship director must ensure that fellows are provided and
199 encouraged to complete the *FMIGS Core-Reading List* (<https://bit.ly/2q2Nlec>) and
200 surgical video curriculum (<https://bit.ly/2IoLPPC>).

201

202 **F. Curriculum**

203 1. Didactic. Education of fellows must include structured teaching conferences,
204 seminars, and didactic instruction in both basic science and clinical aspects of
205 the specialty as outlined in the Educational Objectives. The fellow’s schedule
206 and responsibilities must be structured and protected (i.e. free of clinical
207 duties) to allow regular attendance at didactics, simulation training, and
208 national conferences. Fellows must have progressive teaching responsibilities

209 for resident physicians and ideally with all types of learners (e.g. medical
210 and/or nursing students).

211

212 2. Clinical. The clinical experience of inpatient and outpatient care must include
213 a sufficient number and variety of cases to fulfill the Educational Objectives.

214

215 A) The fellow must be involved with the preoperative planning and care, the
216 surgical care, and the postoperative management of surgical patients.

217 B) Surgical experience is particularly important and must be carefully
218 organized and supervised by the fellowship director and clinical faculty.
219 The fellow must be capable of performing all appropriate diagnostic and
220 therapeutic procedures relevant to the clinical practice of the subspecialty.
221 During the course of the educational program, the fellow must be
222 supervised in all clinical activities, including surgical procedures. The
223 FMIGS Surgical Competency List (<https://bit.ly/2FIXrih>) must be used and
224 completed for each fellow by the end of the fellowship training.

225 C) Surgical procedures available for the fellow must include but are not
226 limited to: diagnostic and operative hysteroscopy, diagnostic and
227 operative laparoscopy, laparotomy, robotic surgery, office procedures,
228 and ambulatory procedures. Additionally, the program must ensure fellow
229 competency in vaginal hysterectomy, the management of small and large
230 bowel concerns as it relates to complex gynecologic disease, and
231 gynecologic conditions that may impact fertility (e.g., uterine septum,
232 intrauterine adhesions, and uterine leiomyomas).

233 D) Fellowships must ensure that graduates perform the minimum number
234 and types of surgical cases prior to graduation as specified in the case
235 minimum list (<https://bit.ly/2obFmWR>). Fellowship leadership must
236 confirm on a weekly basis that cases are being appropriately entered into
237 the case log system.

238 E) The majority of each fellow's clinical experience must be in benign MIGS.
239 The first-year fellowship surgical experience should be broad based, as
240 outlined in the surgical competency list.

241 F) Programs may emphasize specific areas of specialization within MIGS (such
242 as pelvic pain) as an augmentation to the core curriculum.

243

244 1. Schedule

245 The core 2-year fellowship must be structured to show a progression in clinical
246 and teaching responsibilities during the span of the program. A weekly,

247 monthly and yearly clinical and educational schedule must be prepared for
 248 both year -1 and -2. A third year of training can be approved by the FMIGS
 249 Board on a case-by-case basis but must contain a unique educational
 250 experience with defined goals and objectives.

251

252 **G. Research**

253 1. Research Training

254 It is required that the fellow complete a minimum of one course in clinical
 255 research, research design, biostatistics, or epidemiology unless the fellow has
 256 documentation of previous graduate level coursework in one or more of these
 257 topics or holds a graduate level degree that documents competence in the
 258 required area(s). Ideally, the fellow may be given the opportunity to work
 259 towards an advanced degree (e.g. MPH) or certificate in clinical research. This
 260 can be accomplished in a classroom setting or through a fellowship director-
 261 approved online course. The institution must provide financial support for a
 262 minimum of one research-related course.

263

264 Research training must:

- 265 A) Provide structured translational, clinical or surgical research as applied to
- 266 MIGS
- 267 B) Enhance the fellow's understanding of the latest scientific surgical
- 268 techniques
- 269 C) Promote the fellow's academic contributions to the specialty
- 270 D) Further the ability of the fellow to be an independent investigator

271

272 2. Research Projects

273 During training, the fellow will undertake an independent original research
 274 project approved by the fellowship director. The sequence in which research
 275 experience is integrated with clinical training will vary with each program but
 276 should be initiated in the first year of fellowship training. A research mentor
 277 who has expertise (i.e. proven track record of hypothesis-based research
 278 publications) in clinical research and is available and regularly meets with and
 279 mentors the fellow must be appointed. Under the supervision of the research
 280 mentor, the fellow must complete, by the end of his/her final academic year,
 281 at least one IRB approved (if applicable) research project relevant to minimally
 282 invasive gynecologic surgery. This research project must be an original data-
 283 driven project, meta-analysis or a systematic review that conforms to PRISMA
 284 guidelines and ultimately must be submitted for publication to a peer-

285 reviewed journal by the end of fellowship. Writing a textbook chapter, clinical
286 opinion review article, or production of an educational/scientific video does
287 not meet criteria for an approved research project. It is the expectation that
288 most fellow manuscripts will result in publication.

289 **H. Competencies**

290 The fellowship director will provide training and evaluate the fellow according to
291 the following competencies: patient care-clinical and surgical skills, knowledge
292 base, practice-based learning, communication skills, professionalism, system-
293 based practice (see Appendix 1), teaching skills, and scholarly research project
294 development.

295

296 **I. FELLOWSHIP DATES, LEAVE AND TRANSFER**

297 Each program may be approved for a maximum of 2 fellows unless an increase has
298 been requested and granted by the FMIGS Board. An increase in fellow
299 complement will be considered if there exists adequate surgical volume, clinical
300 experience, and research mentorship to support this expansion and that the
301 current fellow experience will be enhanced.

302

303 **START DATE**

304 All fellows will be required to start no later than August 1st. Later start date
305 requests will be given individual consideration. An administrative fee will be
306 incurred if the fellowship program is unable to start fellowship training by August
307 1st. If the start date is delayed for any reason, the fellow's program must still
308 adhere to the minimum 22-month clinical training requirements as described
309 below.

310

311 **Leave**

312 Leave may be granted to a fellow at the discretion of the Fellowship director in
313 accordance with local policy but cannot exceed the limits listed below. Such leaves
314 include maternity, paternity, sick, medical, vacation, funeral, personal, etc. A
315 Fellow's travel to regional, national, or international meetings in order to attend
316 or present research conducted during the program or travel to attend other
317 program-approved educational activities should be counted as an educational
318 endeavor and not as a leave.

319

320 In keeping with the minimum of 22-month clinical training requirement to
 321 graduate from the Fellowship Training, a fellow is allowed:

- 322 • Up to 6 weeks in the first year;
- 323 • Up to 6 weeks in the second year;
- 324 • Not to exceed a total of 8 weeks over the entire 2 years.

325

326 If a fellow's absence from a program exceeds the maximum amount of leave time
 327 allowed in any given year or for the entirety of the program, the expected
 328 completion date must be extended for the duration of time in excess of the
 329 maximum leave. This extension must not detract from the experience of the other
 330 fellows in the program.

331

J. Transfer Policy

332 A fellow may transfer from one FMIGS- program to another. To approve the
 333 transfer, the FMIGS Board must receive:

- 334 a) A letter from the fellow requesting the transfer
- 335 b) A letter from the current Fellowship Director:
 - 336 i. Approving the transfer
 - 337 ii. Outlining the number of months the fellow successfully completed and the
 338 date the fellow will leave the program
 - 339 iii. Describing the rotations completed
 - 340 iv. Assessing the level of competency to date
- 341 c) A letter from the Program Director of the potential (new) program:
 - 342 i. Approving the transfer
 - 343 ii. Outlining the dates the fellow is expected to commence and complete the
 344 program

345 The fellow must still meet the 22-month clinical training requirement even if
 346 portions of that interval are spent in more than one location. If the approved total
 347 fellow positions will be exceeded at any time due to a transfer, an increase must
 348 be approved prior to the transfer occurring.

349

350

K. Requirements for Graduation

351 Upon successful completion of the fellowship, each fellow will receive a certificate
 352 of completion from the FMIGS Board. If these requirements have not been met
 353 by graduation, certification will be withheld until all requirements are fulfilled.

354

355 Requirements for graduation will include:

- 356 1. Satisfactory clinical and surgical training as outlined by the FMIGS Board
- 357 2. Completion of an original research project as described above.
- 358 3. Submit a scientific contribution to a national or international meeting. The
- 359 contribution can be a video, oral or poster presentation.
- 360 4. Completion of at least twenty-two months of training.
- 361 5. When available, completion of the AAGL Essentials in Minimally Invasive
- 362 Gynecology Program.

363

364 L. EVALUATIONS

365 The fellows, faculty, and program must be evaluated. All of the evaluations
 366 performed must be documented in writing, and evidence must be available upon
 367 request by the FMIGS Board.

368

369 1. *Fellow Evaluations*

370 The Fellowship Director must formally evaluate a fellow's progress.
 371 Assessment must include the regular and timely feedback to the fellow that
 372 includes the evaluations of knowledge, skills, research, and professional
 373 growth using appropriate criteria and procedures.

374

375 **Formative Evaluation** The supervising faculty must regularly evaluate (i.e.
 376 minimum of 5 evaluations/month per fellow) fellow performance in a timely
 377 manner after clinical or surgical encounters and document this evaluation using
 378 myTIPreport. Additionally,

379 1. The Program Director must perform an evaluation on each fellow at least
 380 every six months. The evaluation must:

- 381 • Provide objective assessments of competence in patient care, medical
- 382 knowledge, practice-based learning and improvement, interpersonal and
- 383 communication skills, professionalism, and systems-based practice
- 384 • Use multiple evaluators (i.e. faculty, patients, self, and other professional
- 385 staff)
- 386 • Document progressive fellow performance improvement appropriate to
- 387 education level

388 2. **Summative Evaluation** The Program Director must perform a summative
 389 evaluation on each fellow at the completion of the fellowship. This may
 390 replace the final semi-annual evaluation. The evaluation must:

- 391 • Document the fellow’s performance during the final period of education
 392 • Verify that the fellow has demonstrated sufficient competence to practice
 393 without direct supervision

394

395

396 **2. Faculty Evaluation**

397 The performance of each faculty member must be evaluated at least annually by:

- 398 • Each fellow – Must be written (typically electronic) and confidential
 399 • The program – Must include a review of the faculty’s clinical teaching
 400 abilities, commitment to the educational program, clinical knowledge,
 401 professionalism, and scholarly activities.

402

403 **3. Program Evaluation**

404 A meeting to discuss the educational and research mentoring effectiveness of the
 405 program and the curriculum must be held at least annually. The Fellowship
 406 Director, program faculty, and at least one fellow must attend the meeting. The
 407 discussion of the issues must be documented and the results used to improve the
 408 program.

409 During the evaluation process, the attendees must consider:

- 410 • Written comments by faculty and fellows
 411 • Fellow performance
 412 • Faculty performance
 413 • The most recent GME report of the sponsoring institution (if applicable or
 414 available)
 415 • Any additional material that can be used to judge the achievement of the
 416 program’s educational objectives

417

418 **M. INSTITUTIONAL COMMITMENT**

419 The fellowship director must provide evidence of institutional commitment to
 420 support the fellowship. This is to include financial support, clinical environment
 421 for education and adequate research facilities to fulfill FMIGS requirements for a
 422 fellowship program in MIGS.

423

424 **N. POLICIES**

425 **1. Anti-Harassment Policy**

426 All faculty involved with fellowship training must be in compliance with AAGL's
 427 policies to interact with each other for the purposes of professional
 428 development and scholarly interchange so that all members may learn,
 429 network and enjoy the company of colleagues in a professional atmosphere.
 430 Every individual associated with the AAGL has a duty to maintain this
 431 environment free of harassment and intimidation. The program director must
 432 indicate that they have read and will comply with AAGL's Anti-Harassment
 433 policy in the annual report. If a complaint is made by a trainee, it shall be
 434 addressed as set forth in the AAGL Anti-Harassment policy referenced above
 435 The complaint will be investigated and adjudicated by a committee appointed
 436 according to the Grievance Committee Policy. Any reported allegations of
 437 harassment, discrimination, and/or retaliation will be taken seriously and
 438 investigated promptly, thoroughly and impartially as outlined in the Anti-
 439 Harassment policy.

440

441 All program directors and associate program directors must complete
 442 sensitivity training every other year and document compliance in the annual
 443 report and at the site visit.

444

445 **2. FMIGS Grievance Policy (other than anti-harassment)**

446 Fellows that are concerned about their training experience may contact the
 447 FMIGS grievance committee and are referred to the FMIGS Grievance Policy
 448 <https://bit.ly/2zHqIUJ>. If a formal grievance is waged, it will be pursued and
 449 acted by the AAGL Grievance Committee and/or the FMIGS Grievance
 450 Committee.

451 **O. Disciplinary Action / Due Process**

452

453 **Types of Disciplinary Actions**

454 Official disciplinary actions are probation, non-reappointment, or termination. In
 455 general, disciplinary action should follow the due process identified by the primary
 456 training site as is commonly distributed by the Department of Graduate Education.
 457 If any type of disciplinary action is taken, the FMIGS Board must be notified. The
 458 FMIGS Board requires the following sequence:

459

460 Evaluation and feedback

461 The fellow must be advised about deficiencies and the expectations for
462 improvement must be clearly delineated. This must occur every semi-annual
463 evaluation, but also may occur in an interval meeting if needed. The ability to
464 provide useful feedback is contingent upon regularly completed written
465 evaluations of the trainee. The fellowship director needs to provide clear guidance
466 to the training faculty as to the types and frequencies of evaluations expected
467 from them. Verbal feedback from a faculty member to the fellowship director
468 regarding a trainee, either positive or negative, must be followed up with a written
469 communication for the trainee's file.

470

471 Warning

472 When a trainee has been advised about deficiencies but fails to make sufficient
473 improvement, he/she may be warned that continued lack of improvement may
474 result in probation. This information must be provided to the trainee in person
475 and in writing.

476

477 Probation

478 Clearly suboptimal academic and/or clinical performance may warrant probation.
479 The action must be explained to the fellow in person and in writing. Expectations
480 for improvement, the methods for evaluating improvement, the anticipated
481 duration of probation, and possible future actions must be delineated. The trainee
482 must be advised that his/her academic file is always available for review and that
483 he/she may appeal the decision. The trainee should be offered counseling. A
484 sample probationary letter is available from the FMIGS Board but is subject to
485 local variation.

486

487 Non-reappointment/Termination

488 A trainee's failure to remediate suboptimal academic and/or clinical performance
489 may warrant a decision not to reappoint the trainee at the end of the current
490 training year, or, in unusual circumstances, to terminate the contract immediately.
491 The action must be explained to the fellow member in person and in writing. As
492 with a probationary letter, the trainee must be advised that his/her academic file
493 is always available for review and that he/she may appeal the decision. The trainee
494 must be offered counseling. A sample non-reappointment or termination letter is
495 available from the FMIGS Board but is subject to local variation.

496

497 Termination without an intervening period of probation should be reserved for a
498 serious deviation from acceptable academic and clinical performance (e.g.,
499 dereliction of duty) that endangers patient care.

500

501 **The Purpose of Disciplinary Actions**

502 The objective of academic discipline is remediation. Thus, the terms of probation
503 should always be carefully devised to ensure that the trainee has the opportunity
504 to attain the desired improvement and that methods for evaluating that
505 improvement are robust and as objective as possible.

506

507 Timing issues

508 A probationary period must be long enough to permit a thorough evaluation of
509 progress. Except in unusual circumstances, a period of at least 3-4 months is
510 required. The date on which the trainee's status will be reconsidered should be
511 picked in light of possible future actions, such as non-reappointment, so that
512 ideally the trainee will have ample opportunity to find a different training program
513 before the end of his/her training year. Alternatively, if a trainee's lack of progress
514 requires a period of probation late in the training year, there should be
515 consideration of extending the current training year until a decision regarding
516 adequacy of remediation can be made.

517

518 **P. Accreditation of Fellowship Programs**

519 All new fellowship programs must apply to the FMIGS Board. Programs that have
520 demonstrated compliance with the fellowship standards receive accreditation for
521 one or more years.

522

523 Fellowship programs will be evaluated continuously on their compliance with the
524 program requirements. If a program is found to have areas of non-compliance
525 (deficiencies or areas of concern), the FMIGS Board will list these citations, and
526 expect the program to come into compliance in the time period designated.
527 Based on the number, severity and/or persistence of these citations, a program
528 may be given a warning, placed on probation or accreditation may be withdrawn.
529 Fellowships on probation may not recruit for fellows and must notify the current
530 fellows. Please see the FMIGS Accreditation and Review Policy on the website for
531 more details.

532

533 If there are any significant or unexpected changes in the program or status of the
534 fellow (e.g. change in the number of fellow positions, fellowship director, key
535 faculty members, patient volume and procedures; changes in clinical sites or
536 closure of major research programs), the FMIGS Board must be notified
537 electronically within 30 days (fmigs@aagl.org).

538

539 **Q. *Duty Hours***

540 The FMIGS Board expects the ACGME Guidelines regarding Duty Hours to be
541 considered. Detailed information can be accessed at: <https://bit.ly/2Jw2zZr>.
542 Policies and procedures related to duty hours for fellows must be distributed to
543 the fellows and faculty and the program must:

- 544 1. Monitor according to the program policy, with a frequency sufficient to
545 ensure compliance
- 546 2. Monitor the demands of day, night, OB (if applicable), moonlighting and/or
547 at-home call and intervene as necessary to mitigate excessive service
548 and/or fatigue
- 549 3. Monitor the need for and ensure the provision of back up support systems
550 for patient care

551 **R. *Stipend and Benefits***

552 Fellows must be provided a stipend which must be at the minimum equivalent to
553 a PGY-5 or -6 housestaff officer in the geographic region of the program.
554 Candidates invited for an interview are to be informed, in writing or by electronic
555 means, of the terms, conditions, and benefits of their appointment, including
556 stipend and other financial support; vacations; parental, sick and other leaves of
557 absence.

558

559 The following benefits are required:

- 560 1. The fellowship must provide fellows with health, disability and professional
561 liability coverage at all sites and all pertinent information regarding this
562 coverage. Liability coverage must include legal defense and protection against
563 awards from claims reported or filed after the completion of the program(s) if
564 the alleged acts or omissions of the fellows are within the scope of the
565 program(s). Specify if liability coverage is provided for external
566 rotations/electives. Research associated costs (IRB, equipment, publication)
567 must be covered.

568

569 The program must inform the candidate about whether or not the following
570 recommended benefits are provided:

- 571 1. Travel to the Global Congress of the AAGL
- 572 2. Certification as console surgeon for robotically-assisted laparoscopy

573 It is the expectation that programs will not require their fellows to sign a non-
574 compete agreement or restrictive covenant. If the program does require a
575 restrictive covenant clause, they must notify both the FMIGS Board and notify (in
576 writing) all applicants before an initial interview is scheduled.

577 **S. Application Process**

578 The FMIGS Board actively encourages applications from Obstetrician-Gynecologist
579 physicians aspiring to develop their surgical skills in MIGS. The deadline dates for
580 the application process are based upon the National Resident Matching Program
581 (NRMP). Please see our website for details of the deadline dates. Application will
582 be available online at the Fellowship webpage, www.fmigs.org.

583

584 Applications for programs interested in becoming a fellowship training site, are
585 also available on the Fellowship webpage, www.fmigs.org, or by contacting the
586 Fellowship Administrative Assistant at the Fellowship office.

587

588 **T. Match**

589 The Fellowship match is conducted through an objective computer matching
590 program (NRMP). Programs and applicants are required to use the match
591 process. No candidate at any time can be offered a position outside the NRMP
592 match without prior approval from the FMIGS Board. If a fellowship program
593 intends to accept a specific candidate outside the match (e.g. graduating resident
594 from their program), they must contact the FMIGS NRMP representative
595 (<https://bit.ly/2UsP3qW>), obtain FMIGS Board approval for the match waiver and
596 avoid subjecting other candidates to the unnecessary burdens of interviewing.

597

598 The match provides a uniform time for both applicants and fellowship programs
599 to make selection decisions without coercion, undue or unwarranted pressure.
600 Both applicants and fellowship programs may express their interest in each other;
601 however, they shall not solicit verbal or written statements implying a
602 commitment. Applicants shall at all times be free to keep confidential the names
603 or identities of programs to which they have or may apply. Any violations will be

604 addressed by the FMIGS Board and will be subject to consequences as determined
605 by the FMIGS Board.

606

607 **U. Further Information**

608 For further inquiries, please contact the FMIGS Administrative Assistant:

609 6757 Katella Avenue, Cypress, CA 90630-5105 USA.

610 Ph: (800) 554-2245 or (714) 503-6200 • Fax: (714) 503-6202

611 E-mail: fmigs@aagl.org • Web Site: www.aagl.org

612

613

614

V. Appendix 1: Competencies

615

616

1. Patient Care

617

Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Fellows must demonstrate competence in:

618

619

620

A) Evaluating a patient's complaint, providing an accurate examination, employing appropriate diagnostic tests, arriving at a correct diagnosis, and recommending the appropriate treatment

621

622

623

B) The essential areas of benign gynecology including:

624

- normal physiology of reproductive tract

625

- gynecologic management during pregnancy

626

- gynecologic surgery and complications management

627

- management of critically ill patients

628

- gynecologic pathology

629

- the full range of commonly employed diagnostic procedures, including ultrasonography, Computed Tomographic (CT) Magnetic Resonance Imaging (MRI) and other relevant imaging techniques

630

631

632

633

2. Medical Knowledge

634

Fellows must demonstrate knowledge of established and evolving medical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care.

635

636

637

Fellows must demonstrate knowledge in:

638

A) Reproductive health care, diagnosis, management, consultation, and referral

639

640

B) The fundamentals of basic science as applied to MIGS

641

C) Applied surgical anatomy and pathology

642

D) Basics of risk-benefit analysis, epidemiology, statistics, data collection and management, and use of medical literature and assessment of its value

643

644

645

646

647

648

- 649 3. Practice-based Learning and Improvement
650 Fellows must demonstrate the ability to investigate and evaluate their care of
651 patients, to appraise and assimilate scientific evidence, and to continuously
652 improve patient care based on constant self-evaluation and life-long learning.
653 Fellows are expected to develop skills and habits to be able to meet the
654 following goals:
- 655 A) Identify strengths, deficiencies, and limits in one’s knowledge and
656 expertise
 - 657 B) Set learning and improvement goals
 - 658 C) Identify and perform appropriate learning activities
 - 659 D) Systematically analyze practice using quality improvement methods, and
660 implement changes with the goal of practice improvement
 - 661 E) Incorporate formative evaluation feedback into daily practice
 - 662 F) Locate, appraise, and assimilate evidence from scientific studies related to
663 their patient’s health problems
 - 664 G) Use information technology to optimize learning
 - 665 H) Participate in the education of patients, families, students, residents and
666 other health professionals
- 667
- 668 4. Interpersonal and Communication Skills
669 Fellows must demonstrate interpersonal and communication skills that result
670 in the effective exchange of information and collaboration with patients, their
671 families, and health professionals.
672 Fellows are expected to:
- 673 A) Communicate effectively with patients, families, and the public, as
674 appropriate, across a broad range of socioeconomic and cultural
675 backgrounds
 - 676 B) Communicate effectively with physicians, other health professionals,
677 and health related agencies
 - 678 C) Work effectively as a member or leader of a health care team or other
679 professional group
 - 680 D) Act in a consultative role to other physicians and health professionals;
 - 681 E) Maintain comprehensive, timely, and legible medical records, if
682 applicable
 - 683 F) Have the fundamentals of good medical history taking and thoughtful,
684 meticulous physical examination

- 685 5. Professionalism
686 Fellows must demonstrate a commitment to carrying out professional
687 responsibilities and an adherence to ethical principles. Fellows are expected
688 to demonstrate:
- 689 A) Compassion, integrity, and respect for others
 - 690 B) Responsiveness to patient needs that supersedes self-interest
 - 691 C) Respect for patient privacy and autonomy
 - 692 D) Accountability to patients, society and the profession
 - 693 E) Sensitivity and responsiveness to a diverse patient population,
694 including but not limited to diversity in gender, age, culture, race,
695 religion, disabilities, and sexual orientation
 - 696 F) Ethics and medical jurisprudence
- 697
- 698 6. Systems-based Practice
699 Fellows must demonstrate an awareness of and responsiveness to the larger
700 context and system of health care, as well as the ability to call effectively on
701 other resources in the system to provide optimal health care.
702 Fellows are expected to:
- 703 A) Work effectively in various health care delivery settings and systems
704 relevant to their clinical specialty
 - 705 B) Coordinate patient care within the health care system relevant to their
706 clinical specialty
 - 707 C) Incorporate considerations of cost awareness and risk-benefit analysis
708 in patient and/or population-based care as appropriate
 - 709 D) Advocate for quality patient care and optimal patient care systems
 - 710 E) Work in inter-professional teams to enhance patient safety and
711 improve patient care quality
 - 712 F) Participate in identifying system errors and implementing potential
713 systems solutions
- 714
715
