61 **REQUIREMENTS FOR A POST-GRADUATE FELLOWSHIP IN THE SUBSPECIALTY AREA OF**  
62 **MINIMALLY INVASIVE GYNECOLOGIC SURGERY**

63

64 **A. Introduction**

65 Fellowships in Minimally Invasive Gynecologic Surgery in the US / Canada (FMIGS)  
66 and outside the US / Canada (FMIGS-International, FMIGS-I) are intensive training  
67 programs preparing the graduate for advanced minimally invasive gynecologic  
68 surgery (MIGS) expertise. The FMIGS Board is a Professional Interest Partner  
69 under the auspices of the AAGL and accredits all FMIGS and FMIGS-I programs.

70

71 **B. Mission**

72 The mission of the fellowship is to provide a uniform training program for  
73 gynecologists who have completed residency in obstetrics and gynecology and  
74 desire to acquire additional knowledge and surgical skills in minimally invasive  
75 gynecologic surgery (MIGS) so they may: serve as a scholarly and surgical resource  
76 for patients and referring physicians; have the ability to care for patients with  
77 complex gynecologic surgical disease via minimally invasive techniques; establish  
78 sites that will serve a leadership role in advanced endoscopic and reproductive  
79 surgery; and further research in minimally invasive gynecologic surgery.

80

81 **C. Goals**

82 The overall goal of the fellowship is for the graduate to serve as an independent  
83 specialist and consultant in the surgical management and techniques of advanced  
84 benign minimally invasive gynecology at a level surpassing competence expected  
85 by completion of a categorical residency.

86

87 **D. Fellowship Training Program Requirements**

88 The MIGS Fellowship consists of a minimum of two years of continuous education,  
89 training, and research following completion of an obstetrics and gynecology  
90 residency.

91

92 **1. Fellowship Program Director**

93 The fellowship director is ultimately responsible for the design and  
94 implementation of the fellowship-training program. There must be a single  
95 fellowship director with authority and accountability for the operation of the  
96 program. The sponsoring institution (e.g. Designated Institutional Official,  
97 CMO), department chairperson and the FMIGS Board must approve the

98 fellowship director. The fellowship director must have adequate time and  
 99 salary support for a minimum of 8 hours per week on average to oversee and  
 100 prioritize the training and have no conflicts of interest that could interfere with  
 101 this responsibility (e.g. serve as PD for another fellowship, CMO).

102

103 A program coordinator must be designated to assist with administrative  
 104 aspects of the program and receive compensation for time spent.

105

106 The fellowship director must:

- 107 1. Have surgical training and clinical experience
- 108 2. Have educational and administrative experience
- 109 3. Have documented scholarly expertise in MIGS by:
  - 110 1. publication of at least one original research or review article in a
  - 111 peer-reviewed journal within the past two years and at least of two
  - 112 of the three items within the past two years:
    - 113 a. peer-reviewed funding
    - 114 b. presentation at regional or national professional and
    - 115 scientific society meetings
    - 116 c. serve as a reviewer for a major journal
- 117 4. Maintain current certification by the applicable country of practice e.g.
- 118 ABOG or FRCSC in the obstetrics and gynecology specialty and subspecialty
- 119 (when applicable) and in Focused Practice: MIGS (US) when applicable
- 120 5. Have completed an AAGL-accredited fellowship in MIGS, Gynecologic
- 121 Oncology (GO), Female Pelvic Medicine and Reconstructive Surgery
- 122 (FPMRS) or Reproductive Endocrinology and Infertility (REI) for any new or
- 123 incoming fellowship director <sup>1</sup>
- 124 6. Have current medical licensure and appropriate medical staff appointment
- 125 7. Have a minimum of 4 years' independent practice post-fellowship
- 126 experience
- 127 8. Directly supervise the education and mentoring of fellows to ensure that
- 128 they receive the appropriate clinical instruction and training to provide
- 129 safe patient care
- 130 9. Ensure that each fellow completes the research requirements by assigning
- 131 a research mentor and monitoring compliance
- 132 10. Evaluate and document the fellow's performance as described below

---

<sup>1</sup> FMIGS-I program directors may demonstrate MIGS competency based on case list experience

- 133 11. File an Annual Report with the FMIGS Board  
 134 12. Respond in a timely fashion (within ten days) to any inquiry made by the  
 135 FMIGS Board or Site Review and Compliance committee  
 136 13. Ensure a safe learning environment  
 137 14. Ensure that the annual fees and any additional fees related to the  
 138 fellowship program are paid within 60 days of being due  
 139 15. Be an active member of the AAGL and in good standing

140

141 The fellowship director must identify at minimum one Associate Program Director  
 142 with defined responsibilities that includes acting on behalf of the fellowship  
 143 director if they are not available. If the fellowship director and Associate Program  
 144 Director(s) are not able to provide training oversight, it will be the responsibility  
 145 of the sponsoring institution and department to identify a qualified fellowship  
 146 director who is available and willing to provide the fellow with the required  
 147 training. Fellowship programs can identify additional Associate Program Directors  
 148 for oversight at additional training sites (see below). The Associate Program  
 149 Director(s) located at the primary site must be an AAGL member in good standing.

150

151

152

### 153 ***Fellowship Director Changes***

154 The FMIGS Board must approve a change in fellowship director. A letter must be  
 155 sent electronically to the FMIGS office (within 30 days) and indicate the  
 156 resignation of the fellowship director and the appointment of an interim  
 157 fellowship director until the matter has been considered by the Board. The Board  
 158 reserves the right to require additional information and/or site visit.

159

### 160 **2. Core Faculty**

161 There must be adequate faculty with special interest, expertise, and scholarly  
 162 activity related to MIGS that participate in the care of patients and the  
 163 education of fellows.

164

### 165 **3. Facilities**

- 166 1. All MIGS fellowships (with the exception of military programs) must be  
 167 affiliated with an accredited training program(s) as required by the  
 168 National Resident Matching Program (NRMP; [www.nrmp.org](http://www.nrmp.org)). The

- 169 educational program must be sponsored by an ACGME-accredited  
 170 institution or participating site.<sup>2</sup>
- 171 2. The primary hospital facilities must be equipped to provide state-of-the-  
 172 art inpatient and outpatient MIGS experiences.
- 173 3. Sites must provide a private and clean location where fellows may lactate  
 174 and store the milk (i.e. refrigerator). These locations should be in close  
 175 proximity to clinical responsibilities.
- 176 4. Clinical information systems or libraries and/or online information  
 177 systems, including those relevant to the subspecialty, must be readily  
 178 available as resources for patient care and clinical research at the host  
 179 institution.
- 180 5. A breadth of skills and simulation training must be integrated into  
 181 fellowship instruction.
- 182 6. Research support must be available.
- 183 7. Fellows must be provided with dedicated, secluded academic space (i.e.  
 184 fellow office) that is accessible and appropriately located within the clinical  
 185 environment
- 186 8. A program may utilize more than one patient–care facility. If more than  
 187 one site is used, there must be a Program Letter of Agreement (PLA) with  
 188 the ancillary site(s) and appropriate faculty, updated every 10 years. An  
 189 Associate Program Director may be designated to oversee fellow training  
 190 at each ancillary site. The ancillary site(s) will receive the same approval  
 191 period accredited to the program unless there are changes to the ancillary  
 192 site.

193 The Program Letter of Agreement (PLA) must:

- 194 A) Identify the faculty and possibly Associate Program Director who will  
 195 assume both educational and supervisory responsibilities for fellows
- 196 B) Specify responsibilities of the above faculty for teaching, supervision, and  
 197 formal evaluation of fellows
- 198 C) Specify the duration and content of the educational experience
- 199 D) Specify the fellow’s responsibilities at the ancillary institution.

200

201 **E. Educational Objectives**

202 All Educational Objectives (<https://bit.ly/2IsqtLZ>) are directed toward the  
 203 standardization of training in minimally invasive gynecologic surgery. These  
 204 objectives must be addressed in a structured and systematic manner during the

---

<sup>2</sup> This requirement does not apply to FMIG-I programs.

205 training period. The fellowship director must ensure that fellows are provided and  
 206 encouraged to complete the *FMIGS Core-Reading List* (<https://bit.ly/3ir0nit>) and  
 207 surgical video curriculum ([surgeryu.com](http://surgeryu.com)).

208

## 209 **F. Curriculum**

210 1. Didactic. Education of fellows must include dedicated, structured and  
 211 documented teaching conferences that review both the basic science and  
 212 clinical aspects of the specialty as outlined in the Educational Objectives and  
 213 facilitated by faculty. The fellow's schedule and responsibilities must be  
 214 structured and protected (i.e. free of clinical duties) to allow regular  
 215 attendance at didactics, simulation training, and national conferences. Fellows  
 216 must have progressive teaching responsibilities for resident physicians and  
 217 ideally with all types of learners (e.g. medical and/or nursing students).

218

219 2. Clinical. The clinical experience of inpatient and outpatient care must include  
 220 a sufficient number and variety of cases to fulfill the Educational Objectives.

221

222 A) The fellow must be involved with the preoperative planning and care, the  
 223 surgical care, and the postoperative management of surgical patients.

224 B) Surgical experience is particularly important and must be carefully  
 225 organized and supervised by the fellowship director and clinical faculty.  
 226 The fellow must be capable of performing all appropriate diagnostic and  
 227 therapeutic procedures relevant to the clinical practice of the subspecialty.  
 228 During the course of the educational program, the fellow must be  
 229 supervised in all clinical activities, including surgical procedures. The  
 230 FMIGS Surgical Competency List (<https://bit.ly/2FIxrih>) must be used and  
 231 completed for each fellow by the end of the fellowship training.

232 C) Surgical procedures available for the fellow must include but are not  
 233 limited to: diagnostic and operative hysteroscopy, diagnostic and  
 234 operative laparoscopy, laparotomy, robotic surgery, and ambulatory  
 235 procedures. Additionally, the program must ensure fellow competency in  
 236 vaginal hysterectomy, the management of small and large bowel concerns  
 237 as it relates to complex gynecologic disease, and gynecologic conditions  
 238 that may impact fertility (e.g., uterine septum, intrauterine adhesions, and  
 239 uterine leiomyomas).

240 D) Fellowships must ensure that graduates perform the minimum number  
 241 and types of surgical cases prior to graduation as specified in the case  
 242 minimum list (<https://bit.ly/2HRNGI7>). Fellowship leadership must

243 confirm on a weekly basis that cases are being appropriately entered into  
244 the case log system.

245 E) The majority of each fellow's clinical experience must be in benign MIGS.  
246 The first-year fellowship surgical experience should be broad based, as  
247 outlined in the surgical competency list.

248 F) Programs may emphasize specific areas of specialization within MIGS (such  
249 as pelvic pain) as an augmentation to the core curriculum.

250 G) Programs must have an education over service educational milieu.

251

## 252 **Schedule**

253 The core 2-year fellowship must be structured to show a progression in clinical  
254 and teaching responsibilities during the span of the program. A weekly,  
255 monthly and yearly clinical and educational schedule must be prepared for  
256 both year -1 and -2 and available when requested. A third year of training can  
257 be approved by the FMIGS Board on a case-by-case basis but must contain a  
258 unique educational experience with defined goals and objectives.

259

## 260 **G. Research**

### 261 1. Research Training

262 It is required that the fellow complete a minimum of one course in clinical  
263 research, research design, biostatistics, or epidemiology unless the fellow has  
264 documentation of previous graduate level coursework in one or more of these  
265 topics or holds a graduate level degree that documents competence in the  
266 required area(s). Ideally, the fellow may be given the opportunity to work  
267 towards an advanced degree (e.g. MPH) or certificate in clinical research. This  
268 can be accomplished in a classroom setting or through a fellowship director-  
269 approved online course. The institution must provide financial support for a  
270 minimum of one research-related course.

271

272 Research training must:

273 A) Provide structured translational, clinical or surgical research as applied to  
274 MIGS

275 B) Enhance the fellow's understanding of the latest scientific surgical  
276 techniques

277 C) Promote the fellow's academic contributions to the specialty

278 D) Further the ability of the fellow to be an independent investigator

279

280 2. Research Projects

281 During training, the fellow will undertake an independent original research  
 282 project approved by the fellowship director. The sequence in which research  
 283 experience is integrated with clinical training will vary with each program but  
 284 should be initiated in the first year of fellowship training. A research mentor  
 285 who has expertise (i.e. proven track record of hypothesis-based research  
 286 publications) in clinical research and is available and regularly meets (e.g.  
 287 monthly) with and mentors the fellow must be appointed. Under the  
 288 supervision of the research mentor, the fellow must complete, by the end of  
 289 his/her final academic year, at least one IRB approved (if applicable) research  
 290 project relevant to minimally invasive gynecologic surgery. This research  
 291 project must be an original data-driven project, meta-analysis or a systematic  
 292 review that conforms to PRISMA guidelines and ultimately must be submitted  
 293 for publication to a peer-reviewed journal by the end of fellowship. Writing a  
 294 textbook chapter, clinical opinion review article, or production of an  
 295 educational/scientific video does not meet criteria for an approved research  
 296 project. It is the expectation that the fellow thesis will result in publication.

297 **H. Competencies**

298 The fellowship director will provide training and evaluate the fellow according to  
 299 the following competencies: patient care-clinical and surgical skills, knowledge  
 300 base, practice-based learning, communication skills, professionalism, system-  
 301 based practice (see Appendix 1), teaching skills, and scholarly research project  
 302 development.

303

304 **I. FELLOWSHIP DATES, LEAVE AND TRANSFER**

305 Each program may be approved for a maximum of 2 fellows unless an increase has  
 306 been requested and granted by the FMIGS Board. An increase in fellow  
 307 complement will be considered if there exists adequate surgical volume, clinical  
 308 experience, and research mentorship to support this expansion and that the  
 309 current fellow experience will be enhanced.

310

311 **START DATE**

312 All fellows will be required to start no later than August 1<sup>st</sup>. Later start date  
 313 requests will be given individual consideration. An administrative fee will be  
 314 incurred if the fellowship program is unable to start fellowship training by August  
 315 1<sup>st</sup>. If the start date is delayed for any reason, the fellow's program must still

316 adhere to the minimum 22-month unrestricted clinical training requirements as  
317 described below.<sup>3</sup>

318

319 **Leave**

320 Leave may be granted to a fellow at the discretion of the Fellowship director in  
321 accordance with local policy but cannot exceed the limits listed below. Such leaves  
322 include maternity, paternity, sick, medical, vacation, funeral, personal, etc. A  
323 Fellow's travel to regional, national, or international meetings to attend or present  
324 research conducted during the program or travel to attend other program-  
325 approved educational activities should be counted as an educational endeavor  
326 and not as a leave.

327

328 In keeping with the minimum of 22-month clinical training requirement to  
329 graduate from the Fellowship Training, a fellow is allowed:

- 330 • Up to 6 weeks in the first year;
- 331 • Up to 6 weeks in the second year;
- 332 • Not to exceed a total of 8 weeks over the entire 2 years.

333

334 If a fellow's absence from a program exceeds the maximum amount of leave time  
335 allowed in any given year or for the entirety of the program, the expected  
336 completion date must be extended for the duration of time in excess of the  
337 maximum leave. This extension must not detract from the experience of the other  
338 fellows in the program.

339 **J. Transfer Policy**

340 A fellow may transfer from one FMIGS program to another. To approve the  
341 transfer, the FMIGS Board must receive:

- 342 a) A letter from the fellow requesting the transfer
- 343 b) A letter from the current Fellowship Director:
  - 344 i. Approving the transfer
  - 345 ii. Outlining the number of months the fellow successfully completed and the  
346 date the fellow will leave the program
  - 347 iii. Describing the rotations completed
  - 348 iv. Assessing the level of competency to date
- 349 c) A letter from the Program Director of the potential (new) program:

---

<sup>3</sup> Fellowships outside the US/Canada may have a different start date.

- 350 i. Approving the transfer  
 351 ii. Outlining the dates the fellow is expected to commence and complete the  
 352 program

353 The fellow must still meet the 22-month clinical training requirement even if  
 354 portions of that interval are spent in more than one location. If the approved total  
 355 fellow positions will be exceeded at any time due to a transfer, an increase must  
 356 be approved prior to the transfer occurring.

357

### 358 **K. Requirements for Graduation**

359 Upon successful completion of the fellowship, each fellow will receive a certificate  
 360 of completion from the FMIGS Board. If these requirements have not been met  
 361 by graduation, certification will be withheld until all requirements are fulfilled.

362

363 Requirements for graduation will include:

- 364 1. Satisfactory unrestricted clinical and surgical training as outlined by the FMIGS  
 365 Board  
 366 2. Completion of an original research project as described above.  
 367 3. Submit a scientific contribution to a national or international meeting. The  
 368 contribution can be a video, oral or poster presentation.  
 369 4. Completion of at least twenty-two months of training.

370

### 371 **L. EVALUATIONS**

372 The fellows, faculty, and program must be evaluated. All of the evaluations  
 373 performed must be documented in writing, and evidence must be available upon  
 374 request.

375

#### 376 **1. Fellow Evaluations**

377 The Fellowship Director must formally evaluate a fellow's progress.  
 378 Assessment must include the regular and timely feedback to the fellow that  
 379 includes the evaluations of knowledge, skills, research, and professional  
 380 growth using appropriate criteria and procedures.

381

382 **Formative Evaluation** The supervising faculty must regularly evaluate (i.e.  
 383 minimum of 5 evaluations/month per fellow) fellow performance in a timely  
 384 manner after clinical or surgical encounters and document this evaluation using  
 385 myTIPreport. The Program Director must perform an evaluation on each fellow  
 386 at least every six months. The evaluation must:

- 387 • Provide objective assessments of competence in patient care, medical
- 388 knowledge, practice-based learning and improvement, interpersonal and
- 389 communication skills, professionalism, and systems-based practice
- 390 • Use multiple evaluators (i.e. faculty, patients, self, and other professional
- 391 staff)
- 392 • Document progressive fellow performance improvement appropriate to
- 393 education level

394

395 **Summative Evaluation** The Program Director must perform a summative  
 396 evaluation on each fellow at the completion of the fellowship. This may replace  
 397 the final semi-annual evaluation. The evaluation must:

- 398 • Document the fellow’s performance during the final period of education.
- 399 This document must be accessible the FMIGS Board or its designee.
- 400 • Verify that the fellow has demonstrated sufficient competence to practice
- 401 without direct supervision

402

403

## 2. **Faculty Evaluation**

404 The performance of each faculty member must be evaluated at least annually by:

- 405 • Each fellow – Must be written (typically electronic) and confidential
- 406 • The program – Must include a review of the faculty’s clinical teaching
- 407 abilities, commitment to the educational program, clinical knowledge,
- 408 professionalism, and scholarly activities.

409

410

## 3. **Program Evaluation**

411 A meeting to discuss the educational and research mentoring effectiveness of the  
 412 program and the curriculum must be held at least annually. The Fellowship  
 413 Director, program faculty, and at least one fellow must attend the meeting. The  
 414 discussion of the issues must be documented and the results used to improve the  
 415 program. This document must be accessible the FMIGS Board or its designee.

416

417

During the evaluation process, the attendees must consider:

- 418 • Written comments by faculty and fellows
- 419 • Fellow performance
- 420 • Faculty performance
- 421 • The most recent GME report of the sponsoring institution (if applicable or
- 422 available)

- 423                   • Any additional material that can be used to judge the achievement of the  
424                   program’s educational objectives

425

426

#### 427 **M. INSTITUTIONAL COMMITMENT**

428           The fellowship director must provide evidence of institutional commitment to  
429           support the fellowship. This is to include financial support, clinical environment  
430           for education and adequate research facilities to fulfill FMIGS requirements for a  
431           fellowship program in MIGS.

432

#### 433 **N. POLICIES**

##### 434 **1. Anti-Harassment Policy**

435           All faculty involved with fellowship training must be in compliance with AAGL’s  
436           policies to interact with each other for the purposes of professional  
437           development and scholarly interchange so that all members may learn,  
438           network and enjoy the company of colleagues in a professional atmosphere.  
439           Every individual associated with the AAGL has a duty to maintain this  
440           environment free of harassment and intimidation. The program director must  
441           indicate that they have read and will comply with AAGL’s Anti-Harassment  
442           policy in the annual report. If a complaint is made by a trainee, it shall be  
443           addressed as set forth in the AAGL Anti-Harassment policy referenced above.  
444           The complaint will be investigated and adjudicated by a committee appointed  
445           according to the AAGL’s Grievance Committee Policy. Any reported allegations  
446           of harassment, discrimination, and/or retaliation will be taken seriously and  
447           investigated promptly, thoroughly and impartially as outlined in the Anti-  
448           Harassment policy.

449

450           All program directors and associate program directors must complete  
451           sensitivity training every other year and document compliance in the annual  
452           report and at the site visit.

453

##### 454 **2. FMIGS Grievance Policy (other than anti-harassment)**

455           Fellows that are concerned about their training experience may contact the  
456           FMIGS grievance committee and are referred to the FMIGS Grievance Policy  
457           <https://bit.ly/2zHqIUJ>. If a formal grievance is waged, it will be pursued and  
458           acted by the AAGL Grievance Committee and/or the FMIGS Grievance  
459           Committee.

## O. *Disciplinary Action / Due Process*

460  
461  
462  
463  
464  
465

### **Types of Disciplinary Actions**

Official disciplinary actions are probation, non-reappointment, or termination. In general, disciplinary action should follow the due process identified by the primary training site as is commonly distributed by the Department of Graduate Education. If any type of disciplinary action is taken, the FMIGS Board must be notified. The FMIGS Board requires the following sequence:

#### Evaluation and feedback

The fellow must be advised about deficiencies and the expectations for improvement must be clearly delineated. This must occur every semi-annual evaluation, but also may occur in an interval meeting if needed. The ability to provide useful feedback is contingent upon regularly completed written evaluations of the trainee. The fellowship director needs to provide clear guidance to the training faculty as to the types and frequencies of evaluations expected from them. Verbal feedback from a faculty member to the fellowship director regarding a trainee, either positive or negative, must be followed up with a written communication for the trainee's file.

#### Warning

When a trainee has been advised about deficiencies but fails to make sufficient improvement, he/she may be warned that continued lack of improvement may result in probation. This information must be provided to the trainee in person and in writing.

#### Probation

Clearly suboptimal academic and/or clinical performance may warrant probation. The action must be explained to the fellow in person and in writing. Expectations for improvement, the methods for evaluating improvement, the anticipated duration of probation, and possible future actions must be delineated. The trainee must be advised that his/her academic file is always available for review and that he/she may appeal the decision. The trainee should be offered counseling. A sample probationary letter is available from the FMIGS Board but is subject to local variation.

#### Non-reappointment/Termination

497 A trainee's failure to remediate suboptimal academic and/or clinical performance  
498 may warrant a decision not to reappoint the trainee at the end of the current  
499 training year, or, in unusual circumstances, to terminate the contract immediately.  
500 The action must be explained to the fellow member in person and in writing. As  
501 with a probationary letter, the trainee must be advised that his/her academic file  
502 is always available for review and that he/she may appeal the decision. The trainee  
503 must be offered counseling. A sample non-reappointment or termination letter is  
504 available from the FMIGS Board but is subject to local variation.

505

506 Termination without an intervening period of probation should be reserved for a  
507 serious deviation from acceptable academic and clinical performance (e.g.,  
508 dereliction of duty) that endangers patient care.

509

### 510 **The Purpose of Disciplinary Actions**

511 The objective of academic discipline is remediation. Thus, the terms of probation  
512 should always be carefully devised to ensure that the trainee has the opportunity  
513 to attain the desired improvement and that methods for evaluating that  
514 improvement are robust and as objective as possible.

515

#### 516 Timing issues

517 A probationary period must be long enough to permit a thorough evaluation of  
518 progress. Except in unusual circumstances, a period of at least 3-4 months is  
519 required. The date on which the trainee's status will be reconsidered should be  
520 picked in light of possible future actions, such as non-reappointment, so that  
521 ideally the trainee will have ample opportunity to find a different training program  
522 before the end of his/her training year. Alternatively, if a trainee's lack of progress  
523 requires a period of probation late in the training year, there should be  
524 consideration of extending the current training year until a decision regarding  
525 adequacy of remediation can be made.

526

### 527 **P. Accreditation of Fellowship Programs**

528 All new fellowship programs must apply to the FMIGS Board. Programs that have  
529 demonstrated compliance with the fellowship standards receive accreditation for  
530 one or more years.

531

532 Fellowship programs will be evaluated continuously on their compliance with the  
 533 program requirements. If a program is found to have areas of non-compliance  
 534 (deficiencies or areas of concern), the FMIGS Board will list these citations, and  
 535 expect the program to come into compliance in the time period designated.  
 536 Based on the number, severity and/or persistence of these citations, a program  
 537 may be given a warning, placed on probation or accreditation may be withdrawn.  
 538 Fellowships on probation may not recruit for fellows and must notify the current  
 539 fellows. Please see the FMIGS Accreditation and Review Policy on the website for  
 540 more details.

541

542 If there are any significant or unexpected changes in the program or status of the  
 543 fellow (e.g. change in the number of fellow positions, fellowship director, key  
 544 faculty members, patient volume and procedures; changes in clinical sites or  
 545 closure of major research programs), the FMIGS Board must be notified  
 546 electronically within 30 days (fmigs@aagl.org).

547

548 **Q. *Fatigue Monitoring and Mitigation/Duty Hours***

549 The FMIGS Board requires that the ACGME Fatigue Mitigation and duty hour  
 550 guidelines are followed. Detailed information can be accessed at:

551 <https://www.acgme.org/Portals/0/PFAssets/ProgramRequirements/CPRFellows>  
 552 [hip2020.pdf](https://www.acgme.org/Portals/0/PFAssets/ProgramRequirements/CPRFellows)

553

554 Policies and procedures related to duty hours for fellows must be distributed to  
 555 the fellows and faculty and the program must:

- 556 1. Monitor according to the program policy, with a frequency sufficient to  
 557 ensure duty hour compliance
- 558 2. Ensure the provision of back up support systems for patient care
- 559 3. Educate core faculty members and fellows to recognize the signs of fatigue  
 560 and sleep deprivation
- 561 4. Monitor the demands of day, night, OB (if applicable), moonlighting and/or  
 562 at-home call and intervene as necessary to mitigate excessive service  
 563 and/or fatigue

564 **R. *Stipend and Benefits***<sup>4</sup>

565 Fellows must be provided a stipend which must be at the minimum equivalent to  
 566 a PGY-5 or -6 housestaff officer in the geographic region of the program.  
 567 Candidates invited for an interview are to be informed, in writing or by electronic  
 568 means, of the terms, conditions, and benefits of their appointment, including  
 569 stipend and other financial support; vacations; parental, sick and other leaves of  
 570 absence.

571

572 The following benefits are required:

- 573 1. The fellowship must provide fellows with health, disability and professional  
 574 liability coverage at all sites and all pertinent information regarding this  
 575 coverage. Liability coverage must include legal defense and protection against  
 576 awards from claims reported or filed after the completion of the program(s) if  
 577 the alleged acts or omissions of the fellows are within the scope of the  
 578 program(s). Specify if liability coverage is provided for external  
 579 rotations/electives. Research associated costs (IRB, equipment, publication)  
 580 must be covered.

581

582 The program is strongly encouraged to provide time and support for the following  
 583 benefits:

- 584 1. Travel to the Global Congress of the AAGL and Bootcamp (if applicable)  
 585 2. Certification as console surgeon for robotically-assisted laparoscopy

586

---

<sup>4</sup> *FMIGS-I Stipend and Benefits*

Prior to an interview, candidates invited for an interview are to be informed, in writing or by electronic means, of the terms, conditions, and benefits of their appointment, including possible stipend and other financial support; vacations; parental, sick and other leaves of absence. The FMIGS-I training program must ensure that irrespective of the rotation site, the fellow has the financial means to support themselves during training, will not be liable should a legal defense be required, has the means and support to perform research, has health insurance.

The program must inform the candidate about whether the following recommended benefits are provided travel to the Global Congress of the AAGL and Bootcamp and certification as console surgeon for robotically-assisted laparoscopy.

587 It is the expectation that programs will not require their fellows to sign a non-  
588 compete agreement or restrictive covenant. If the program does require a  
589 restrictive covenant clause, they must notify both the FMIGS Board and notify (in  
590 writing) all applicants before an initial interview is scheduled.

591  
592

### 593 **S. Application Process**

594 The FMIGS Board actively encourages applications from Obstetrician-Gynecologist  
595 physicians aspiring to develop their surgical skills in MIGS. Please see the website  
596 for details of the deadline dates. Application will be available online at the  
597 Fellowship webpage, [www.fmigs.org](http://www.fmigs.org).

598

599 Applications for programs interested in becoming a fellowship training site, are  
600 also available on the Fellowship webpage, [www.fmigs.org](http://www.fmigs.org), or by contacting the  
601 Fellowship Administrative Assistant at the Fellowship office.

602

### 603 **T. Match<sup>5</sup>**

604 The Fellowship match is conducted through an objective computer matching  
605 program (NRMP). Programs and applicants are required to use the match  
606 process. No candidate at any time can be offered a position outside the NRMP  
607 match without prior approval from the FMIGS Board. If a fellowship program  
608 intends to accept a specific candidate outside the match (e.g. graduating resident  
609 from their program), they must contact the FMIGS NRMP representative  
610 (<https://bit.ly/2UsP3qW>), obtain FMIGS Board approval for the match waiver and  
611 avoid subjecting other candidates to the unnecessary burdens of interviewing.

612

613 The match provides a uniform time for both applicants and fellowship programs  
614 to make selection decisions without coercion, undue or unwarranted pressure.  
615 Both applicants and fellowship programs may express their interest in each other;  
616 however, they shall not solicit verbal or written statements implying a  
617 commitment. Applicants shall at all times be free to keep confidential the names  
618 or identities of programs to which they have or may apply. Any violations will be  
619 addressed by the FMIGS Board and will be subject to consequences as determined  
620 by the FMIGS Board.

621

---

<sup>5</sup> Matching into an FMIGS-I program will take place after the NRMP match results have been released.

622 **U. Further Information**

623 For further inquiries, please contact the FMIGS Administrative Assistant:

624 6757 Katella Avenue, Cypress, CA 90630-5105 USA.

625 Ph: (800) 554-2245 or (714) 503-6200 • Fax: (714) 503-6202

627

628

629

**V. Appendix 1: Competencies**

630

631

**1. Patient Care**

632

Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Fellows must demonstrate competence in:

633

634

635

A) Evaluating a patient's complaint, providing an accurate examination, employing appropriate diagnostic tests, arriving at a correct diagnosis, and recommending the appropriate treatment

636

637

638

B) The essential areas of benign gynecology including:

639

- normal physiology of reproductive tract

640

- gynecologic management during pregnancy

641

- gynecologic surgery and complications management

642

- management of critically ill patients

643

- gynecologic pathology

644

- the full range of commonly employed diagnostic procedures, including ultrasonography, Computed Tomographic (CT) Magnetic Resonance Imaging (MRI) and other relevant imaging techniques

645

646

647

648

**2. Medical Knowledge**

649

Fellows must demonstrate knowledge of established and evolving medical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care.

650

651

652

Fellows must demonstrate knowledge in:

653

A) Reproductive health care, diagnosis, management, consultation, and referral

654

655

B) The fundamentals of basic science as applied to MIGS

656

C) Applied surgical anatomy and pathology

657

D) Basics of risk-benefit analysis, epidemiology, statistics, data collection and management, and use of medical literature and assessment of its value

658

659

660

661

662

663

664 3. Practice-based Learning and Improvement

665 Fellows must demonstrate the ability to investigate and evaluate their care of  
 666 patients, to appraise and assimilate scientific evidence, and to continuously  
 667 improve patient care based on constant self-evaluation and life-long learning.  
 668 Fellows are expected to develop skills and habits to be able to meet the  
 669 following goals:

- 670 A) Identify strengths, deficiencies, and limits in one's knowledge and  
 671 expertise
- 672 B) Set learning and improvement goals
- 673 C) Identify and perform appropriate learning activities
- 674 D) Systematically analyze practice using quality improvement methods, and  
 675 implement changes with the goal of practice improvement
- 676 E) Incorporate formative evaluation feedback into daily practice
- 677 F) Locate, appraise, and assimilate evidence from scientific studies related to  
 678 their patient's health problems
- 679 G) Use information technology to optimize learning
- 680 H) Participate in the education of patients, families, students, residents and  
 681 other health professionals

682

683 4. Interpersonal and Communication Skills

684 Fellows must demonstrate interpersonal and communication skills that result  
 685 in the effective exchange of information and collaboration with patients, their  
 686 families, and health professionals.

687 Fellows are expected to:

- 688 A) Communicate effectively with patients, families, and the public, as  
 689 appropriate, across a broad range of socioeconomic and cultural  
 690 backgrounds
- 691 B) Communicate effectively with physicians, other health professionals,  
 692 and health related agencies
- 693 C) Work effectively as a member or leader of a health care team or other  
 694 professional group
- 695 D) Act in a consultative role to other physicians and health professionals;
- 696 E) Maintain comprehensive, timely, and legible medical records, if  
 697 applicable
- 698 F) Have the fundamentals of good medical history taking and thoughtful,  
 699 meticulous physical examination

700 5. Professionalism  
701 Fellows must demonstrate a commitment to carrying out professional  
702 responsibilities and an adherence to ethical principles. Fellows are expected  
703 to demonstrate:

- 704 A) Compassion, integrity, and respect for others
- 705 B) Responsiveness to patient needs that supersedes self-interest
- 706 C) Respect for patient privacy and autonomy
- 707 D) Accountability to patients, society and the profession
- 708 E) Sensitivity and responsiveness to a diverse patient population,  
709 including but not limited to diversity in gender, age, culture, race,  
710 religion, disabilities, and sexual orientation
- 711 F) Ethics and medical jurisprudence

712  
713 6. Systems-based Practice  
714 Fellows must demonstrate an awareness of and responsiveness to the larger  
715 context and system of health care, as well as the ability to call effectively on  
716 other resources in the system to provide optimal health care.

- 717 Fellows are expected to:
- 718 A) Work effectively in various health care delivery settings and systems  
719 relevant to their clinical specialty
  - 720 B) Coordinate patient care within the health care system relevant to their  
721 clinical specialty
  - 722 C) Incorporate considerations of cost awareness and risk-benefit analysis  
723 in patient and/or population-based care as appropriate
  - 724 D) Advocate for quality patient care and optimal patient care systems
  - 725 E) Work in inter-professional teams to enhance patient safety and  
726 improve patient care quality
  - 727 F) Participate in identifying system errors and implementing potential  
728 systems solutions

729  
730
