61 **REQUIREMENTS FOR A POST-GRADUATE FELLOWSHIP IN THE SUBSPECIALTY AREA OF**  
62 **MINIMALLY INVASIVE GYNECOLOGIC SURGERY**

63

64 **A. Introduction**

65 Fellowships in Minimally Invasive Gynecologic Surgery in the US / Canada (FMIGS)  
66 and outside the US / Canada (FMIGS-International, FMIGS-I) are intensive training  
67 programs preparing the graduate for advanced minimally invasive gynecologic  
68 surgery (MIGS) expertise. The FMIGS Board is a Professional Interest Partner  
69 under the auspices of the AAGL and accredits all FMIGS and FMIGS-I programs.

70

71 **B. Mission**

72 The mission of the fellowship is to provide a uniform training program for  
73 gynecologists who have completed residency in obstetrics and gynecology and  
74 desire to acquire additional knowledge and surgical skills in minimally invasive  
75 gynecologic surgery (MIGS) so they may: serve as a scholarly and surgical resource  
76 for patients and referring physicians; have the ability to care for patients with  
77 complex gynecologic surgical disease via minimally invasive techniques; establish  
78 sites that will serve a leadership role in advanced endoscopic and reproductive  
79 surgery; and further research in minimally invasive gynecologic surgery.

80

81 **C. Goals**

82 The overall goal of the fellowship is for the graduate to serve as an independent  
83 specialist and consultant in the surgical management and techniques of advanced  
84 benign minimally invasive gynecology at a level surpassing competence expected  
85 by completion of a categorical residency.

86

87 **D. Fellowship Training Program Requirements**

88 The MIGS Fellowship consists of a minimum of two years of continuous education,  
89 training, and research following completion of an obstetrics and gynecology  
90 residency.

91

92 **1. Fellowship Program Director**

93 The fellowship director is ultimately responsible for the design and  
94 implementation of the fellowship-training program. There must be a single  
95 fellowship director with authority and accountability for the operation of the  
96 program. The sponsoring institution (e.g. Designated Institutional Official,  
97 CMO), department chairperson and the FMIGS Board must approve the

98 fellowship director. The fellowship director must have adequate time and  
 99 salary support for a minimum of 8 hours per week on average to oversee and  
 100 prioritize the training and have no conflicts of interest that could interfere with  
 101 this responsibility (e.g. serve as PD for another fellowship, CMO).  
 102

103 A program coordinator must be designated to assist with administrative  
 104 aspects of the program and receive compensation for time spent.  
 105

106 The fellowship director must:

- 107 1. Have surgical training and clinical experience
- 108 2. Have educational and administrative experience
- 109 3. Have documented scholarly expertise in MIGS by:
  - 110 1. publication of at least one original research or review article in a  
 111 peer-reviewed journal within the past two years and at least of two  
 112 of the three items within the past two years:
    - 113 a. peer-reviewed funding
    - 114 b. presentation at regional or national professional and  
 115 scientific society meetings
    - 116 c. serve as a reviewer for a major journal
  - 117 4. Maintain current certification by the applicable country of practice e.g.  
 118 ABOG or FRCSC in the obstetrics and gynecology specialty and subspecialty  
 119 (when applicable) and in Focused Practice: MIGS (US) when applicable
  - 120 5. Have completed an AAGL-accredited fellowship in MIGS, Gynecologic  
 121 Oncology (GO), Female Pelvic Medicine and Reconstructive Surgery  
 122 (FPMRS) or Reproductive Endocrinology and Infertility (REI) for any new or  
 123 incoming fellowship director <sup>1</sup>
  - 124 6. Have current medical licensure and appropriate medical staff appointment
  - 125 7. Have a minimum of 4 years' independent practice post-fellowship  
 126 experience
  - 127 8. Directly supervise the education and mentoring of fellows to ensure that  
 128 they receive the appropriate clinical instruction and training to provide  
 129 safe patient care
  - 130 9. Ensure that each fellow completes the research requirements by assigning  
 131 a research mentor and monitoring compliance
  - 132 10. Evaluate and document the fellow's performance as described below
  - 133 11. File an Annual Report with the FMIGS Board

---

<sup>1</sup> FMIGS-I program directors may demonstrate MIGS competency based on case list experience

- 134 12. Respond in a timely fashion (within ten days) to any inquiry made by the  
 135 FMIGS Board or Site Review and Compliance committee  
 136 13. Ensure a safe learning environment  
 137 14. Ensure that the annual fees and any additional fees related to the  
 138 fellowship program are paid within 60 days of being due  
 139 15. Be an active member of the AAGL and in good standing  
 140

141 The fellowship director must identify at minimum one Associate Program Director  
 142 with defined responsibilities that includes acting on behalf of the fellowship  
 143 director if they are not available. If the fellowship director and Associate Program  
 144 Director(s) are not able to provide training oversight, it will be the responsibility  
 145 of the sponsoring institution and department to identify a qualified fellowship  
 146 director who is available and willing to provide the fellow with the required  
 147 training. Fellowship programs can identify additional Associate Program Directors  
 148 for oversight at additional training sites (see below). The Associate Program  
 149 Director(s) located at the primary site must be an AAGL member in good standing.  
 150

### 151 ***Fellowship Director Changes***

152 The FMIGS Board must approve a change in fellowship director. A letter must be  
 153 sent electronically to the FMIGS office (within 30 days) and indicate the  
 154 resignation of the fellowship director and the appointment of an interim  
 155 fellowship director until the matter has been considered by the Board. The Board  
 156 reserves the right to require additional information and/or site visit.  
 157

## 158 **2. Core Faculty**

159 There must be adequate faculty with special interest, expertise, and scholarly  
 160 activity related to MIGS that participate in the care of patients and the  
 161 education of fellows.  
 162

## 163 **3. Facilities**

- 164 1. All MIGS fellowships (with the exception of military programs) must be  
 165 affiliated with an accredited training program(s) as required by the  
 166 National Resident Matching Program (NRMP; [www.nrmp.org](http://www.nrmp.org)). The  
 167 educational program must be sponsored by an ACGME-accredited  
 168 institution or participating site.<sup>2</sup>

---

<sup>2</sup> This requirement does not apply to FMIG-I programs.

- 169 2. The primary hospital facilities must be equipped to provide state-of-the-  
 170 art inpatient and outpatient MIGS experiences.
- 171 3. Sites must provide a private and clean location where fellows may lactate  
 172 and store the milk (i.e. refrigerator). These locations should be in close  
 173 proximity to clinical responsibilities.
- 174 4. Clinical information systems or libraries and/or online information  
 175 systems, including those relevant to the subspecialty, must be readily  
 176 available as resources for patient care and clinical research at the host  
 177 institution.
- 178 5. A breadth of skills and simulation training must be integrated into  
 179 fellowship instruction.
- 180 6. Research support must be available.
- 181 7. Fellows must be provided with dedicated, secluded academic space (i.e.  
 182 fellow office) that is accessible and appropriately located within the clinical  
 183 environment
- 184 8. A program may utilize more than one patient–care facility. If more than  
 185 one site is used, there must be a Program Letter of Agreement (PLA) with  
 186 the ancillary site(s) and appropriate faculty, updated every 10 years. An  
 187 Associate Program Director may be designated to oversee fellow training  
 188 at each ancillary site. The ancillary site(s) will receive the same approval  
 189 period accredited to the program unless there are changes to the ancillary  
 190 site.

191 The Program Letter of Agreement (PLA) must:

- 192 A) Identify the faculty and possibly Associate Program Director who will  
 193 assume both educational and supervisory responsibilities for fellows
- 194 B) Specify responsibilities of the above faculty for teaching, supervision, and  
 195 formal evaluation of fellows
- 196 C) Specify the duration and content of the educational experience
- 197 D) Specify the fellow’s responsibilities at the ancillary institution.

198

199 **E. Educational Objectives**

200 All Educational Objectives (<https://bit.ly/2IsqtLZ>) are directed toward the  
 201 standardization of training in minimally invasive gynecologic surgery. These  
 202 objectives must be addressed in a structured and systematic manner during the  
 203 training period. The fellowship director must ensure that fellows are provided and  
 204 encouraged to complete the *FMIGS Core-Reading List* (<https://bit.ly/2q2Nlec>) and  
 205 surgical video curriculum (<https://bit.ly/2loLPPC>).

207 **F. Curriculum**

- 208 1. Didactic. Education of fellows must include dedicated, structured and  
209 documented teaching conferences that review both the basic science and  
210 clinical aspects of the specialty as outlined in the Educational Objectives and  
211 facilitated by faculty. The fellow's schedule and responsibilities must be  
212 structured and protected (i.e. free of clinical duties) to allow regular  
213 attendance at didactics, simulation training, and national conferences. Fellows  
214 must have progressive teaching responsibilities for resident physicians and  
215 ideally with all types of learners (e.g. medical and/or nursing students).  
216
- 217 2. Clinical. The clinical experience of inpatient and outpatient care must include  
218 a sufficient number and variety of cases to fulfill the Educational Objectives.  
219
- 220 A) The fellow must be involved with the preoperative planning and care, the  
221 surgical care, and the postoperative management of surgical patients.
- 222 B) Surgical experience is particularly important and must be carefully  
223 organized and supervised by the fellowship director and clinical faculty.  
224 The fellow must be capable of performing all appropriate diagnostic and  
225 therapeutic procedures relevant to the clinical practice of the subspecialty.  
226 During the course of the educational program, the fellow must be  
227 supervised in all clinical activities, including surgical procedures. The  
228 FMIGS Surgical Competency List (<https://bit.ly/2FIXrih>) must be used and  
229 completed for each fellow by the end of the fellowship training.
- 230 C) Surgical procedures available for the fellow must include but are not  
231 limited to: diagnostic and operative hysteroscopy, diagnostic and  
232 operative laparoscopy, laparotomy, robotic surgery, and ambulatory  
233 procedures. Additionally, the program must ensure fellow competency in  
234 vaginal hysterectomy, the management of small and large bowel concerns  
235 as it relates to complex gynecologic disease, and gynecologic conditions  
236 that may impact fertility (e.g., uterine septum, intrauterine adhesions, and  
237 uterine leiomyomas).
- 238 D) Fellowships must ensure that graduates perform the minimum number  
239 and types of surgical cases prior to graduation as specified in the case  
240 minimum list (<https://bit.ly/2obFmwR>). Fellowship leadership must  
241 confirm on a weekly basis that cases are being appropriately entered into  
242 the case log system.

- 243 E) The majority of each fellow’s clinical experience must be in benign MIGS.  
 244 The first-year fellowship surgical experience should be broad based, as  
 245 outlined in the surgical competency list.  
 246 F) Programs may emphasize specific areas of specialization within MIGS (such  
 247 as pelvic pain) as an augmentation to the core curriculum.  
 248 G) Programs must have an education over service educational milieu.

249

### 250 **Schedule**

251 The core 2-year fellowship must be structured to show a progression in clinical  
 252 and teaching responsibilities during the span of the program. A weekly,  
 253 monthly and yearly clinical and educational schedule must be prepared for  
 254 both year -1 and -2 and available when requested. A third year of training can  
 255 be approved by the FMIGS Board on a case-by-case basis but must contain a  
 256 unique educational experience with defined goals and objectives.

257

### 258 **G. Research**

#### 259 1. Research Training

260 It is required that the fellow complete a minimum of one course in clinical  
 261 research, research design, biostatistics, or epidemiology unless the fellow has  
 262 documentation of previous graduate level coursework in one or more of these  
 263 topics or holds a graduate level degree that documents competence in the  
 264 required area(s). Ideally, the fellow may be given the opportunity to work  
 265 towards an advanced degree (e.g. MPH) or certificate in clinical research. This  
 266 can be accomplished in a classroom setting or through a fellowship director-  
 267 approved online course. The institution must provide financial support for a  
 268 minimum of one research-related course.

269

270 Research training must:

- 271 A) Provide structured translational, clinical or surgical research as applied to  
 272 MIGS  
 273 B) Enhance the fellow’s understanding of the latest scientific surgical  
 274 techniques  
 275 C) Promote the fellow’s academic contributions to the specialty  
 276 D) Further the ability of the fellow to be an independent investigator

277

#### 278 2. Research Projects

279 During training, the fellow will undertake an independent original research  
 280 project approved by the fellowship director. The sequence in which research

281 experience is integrated with clinical training will vary with each program but  
 282 should be initiated in the first year of fellowship training. A research mentor  
 283 who has expertise (i.e. proven track record of hypothesis-based research  
 284 publications) in clinical research and is available and regularly meets (e.g.  
 285 monthly) with and mentors the fellow must be appointed. Under the  
 286 supervision of the research mentor, the fellow must complete, by the end of  
 287 his/her final academic year, at least one IRB approved (if applicable) research  
 288 project relevant to minimally invasive gynecologic surgery. This research  
 289 project must be an original data-driven project, meta-analysis or a systematic  
 290 review that conforms to PRISMA guidelines and ultimately must be submitted  
 291 for publication to a peer-reviewed journal by the end of fellowship. Writing a  
 292 textbook chapter, clinical opinion review article, or production of an  
 293 educational/scientific video does not meet criteria for an approved research  
 294 project. It is the expectation that the fellow thesis will result in publication.

#### 295 **H. Competencies**

296 The fellowship director will provide training and evaluate the fellow according to  
 297 the following competencies: patient care-clinical and surgical skills, knowledge  
 298 base, practice-based learning, communication skills, professionalism, system-  
 299 based practice (see Appendix 1), teaching skills, and scholarly research project  
 300 development.

301

#### 302 **I. FELLOWSHIP DATES, LEAVE AND TRANSFER**

303 Each program may be approved for a maximum of 2 fellows unless an increase has  
 304 been requested and granted by the FMIGS Board. An increase in fellow  
 305 complement will be considered if there exists adequate surgical volume, clinical  
 306 experience, and research mentorship to support this expansion and that the  
 307 current fellow experience will be enhanced.

308

#### 309 **START DATE**

310 All fellows will be required to start no later than August 1<sup>st</sup>. Later start date  
 311 requests will be given individual consideration. An administrative fee will be  
 312 incurred if the fellowship program is unable to start fellowship training by August  
 313 1<sup>st</sup>. If the start date is delayed for any reason, the fellow's program must still  
 314 adhere to the minimum 22-month unrestricted clinical training requirements as  
 315 described below.<sup>3</sup>

316

---

<sup>3</sup> Fellowships outside the US/Canada may have a different start date.

317 **Leave**

318 Leave may be granted to a fellow at the discretion of the Fellowship director in  
 319 accordance with local policy but cannot exceed the limits listed below. Such leaves  
 320 include maternity, paternity, sick, medical, vacation, funeral, personal, etc. A  
 321 Fellow's travel to regional, national, or international meetings to attend or present  
 322 research conducted during the program or travel to attend other program-  
 323 approved educational activities should be counted as an educational endeavor  
 324 and not as a leave.

325

326 In keeping with the minimum of 22-month clinical training requirement to  
 327 graduate from the Fellowship Training, a fellow is allowed:

- 328 • Up to 6 weeks in the first year;
- 329 • Up to 6 weeks in the second year;
- 330 • Not to exceed a total of 8 weeks over the entire 2 years.

331

332 If a fellow's absence from a program exceeds the maximum amount of leave time  
 333 allowed in any given year or for the entirety of the program, the expected  
 334 completion date must be extended for the duration of time in excess of the  
 335 maximum leave. This extension must not detract from the experience of the other  
 336 fellows in the program.

337 **J. Transfer Policy**

338 A fellow may transfer from one FMIGS program to another. To approve the  
 339 transfer, the FMIGS Board must receive:

- 340 a) A letter from the fellow requesting the transfer
- 341 b) A letter from the current Fellowship Director:
  - 342 i. Approving the transfer
  - 343 ii. Outlining the number of months the fellow successfully completed and the  
 344 date the fellow will leave the program
  - 345 iii. Describing the rotations completed
  - 346 iv. Assessing the level of competency to date
- 347 c) A letter from the Program Director of the potential (new) program:
  - 348 i. Approving the transfer
  - 349 ii. Outlining the dates the fellow is expected to commence and complete the  
 350 program

351 The fellow must still meet the 22-month clinical training requirement even if  
 352 portions of that interval are spent in more than one location. If the approved total

353 fellow positions will be exceeded at any time due to a transfer, an increase must  
 354 be approved prior to the transfer occurring.

355

### 356 **K. Requirements for Graduation**

357 Upon successful completion of the fellowship, each fellow will receive a certificate  
 358 of completion from the FMIGS Board. If these requirements have not been met  
 359 by graduation, certification will be withheld until all requirements are fulfilled.

360

361 Requirements for graduation will include:

- 362 1. Satisfactory unrestricted clinical and surgical training as outlined by the FMIGS  
 363 Board
- 364 2. Completion of an original research project as described above.
- 365 3. Submit a scientific contribution to a national or international meeting. The  
 366 contribution can be a video, oral or poster presentation.
- 367 4. Completion of at least twenty-two months of training.

368

### 369 **L. EVALUATIONS**

370 The fellows, faculty, and program must be evaluated. All of the evaluations  
 371 performed must be documented in writing, and evidence must be available upon  
 372 request.

373

#### 374 **1. Fellow Evaluations**

375 The Fellowship Director must formally evaluate a fellow's progress.  
 376 Assessment must include the regular and timely feedback to the fellow that  
 377 includes the evaluations of knowledge, skills, research, and professional  
 378 growth using appropriate criteria and procedures.

379

380 **Formative Evaluation** The supervising faculty must regularly evaluate (i.e.  
 381 minimum of 5 evaluations/month per fellow) fellow performance in a timely  
 382 manner after clinical or surgical encounters and document this evaluation using  
 383 myTIPreport. The Program Director must perform an evaluation on each fellow  
 384 at least every six months. The evaluation must:

- 385 • Provide objective assessments of competence in patient care, medical  
 386 knowledge, practice-based learning and improvement, interpersonal and  
 387 communication skills, professionalism, and systems-based practice
- 388 • Use multiple evaluators (i.e. faculty, patients, self, and other professional  
 389 staff)

- 390           • Document progressive fellow performance improvement appropriate to  
391           education level

392

393           **Summative Evaluation** The Program Director must perform a summative  
394           evaluation on each fellow at the completion of the fellowship. This may replace  
395           the final semi-annual evaluation. The evaluation must:

- 396           • Document the fellow’s performance during the final period of education.  
397           This document must be accessible the FMIGS Board or its designee.  
398           • Verify that the fellow has demonstrated sufficient competence to practice  
399           without direct supervision

400

## 401           **2. Faculty Evaluation**

402           The performance of each faculty member must be evaluated at least annually by:

- 403           • Each fellow – Must be written (typically electronic) and confidential  
404           • The program – Must include a review of the faculty’s clinical teaching  
405           abilities, commitment to the educational program, clinical knowledge,  
406           professionalism, and scholarly activities.

407

## 408           **3. Program Evaluation**

409           A meeting to discuss the educational and research mentoring effectiveness of the  
410           program and the curriculum must be held at least annually. The Fellowship  
411           Director, program faculty, and at least one fellow must attend the meeting. The  
412           discussion of the issues must be documented and the results used to improve the  
413           program. This document must be accessible the FMIGS Board or its designee.

414

415           During the evaluation process, the attendees must consider:

- 416           • Written comments by faculty and fellows  
417           • Fellow performance  
418           • Faculty performance  
419           • The most recent GME report of the sponsoring institution (if applicable or  
420           available)  
421           • Any additional material that can be used to judge the achievement of the  
422           program’s educational objectives

423

424

425

**M. INSTITUTIONAL COMMITMENT**

426

427

428

429

430

431

**N. POLICIES**

432

**1. Anti-Harassment Policy**

433

441

442

443

444

445

446

447

448

449

450

451

452

**2. FMIGS Grievance Policy (other than anti-harassment)**

453

454

455

456

457

458

**O. Disciplinary Action / Due Process**

459

460 **Types of Disciplinary Actions**

461 Official disciplinary actions are probation, non-reappointment, or termination. In  
462 general, disciplinary action should follow the due process identified by the primary  
463 training site as is commonly distributed by the Department of Graduate Education.  
464 If any type of disciplinary action is taken, the FMIGS Board must be notified. The  
465 FMIGS Board requires the following sequence:

466

467 Evaluation and feedback

468 The fellow must be advised about deficiencies and the expectations for  
469 improvement must be clearly delineated. This must occur every semi-annual  
470 evaluation, but also may occur in an interval meeting if needed. The ability to  
471 provide useful feedback is contingent upon regularly completed written  
472 evaluations of the trainee. The fellowship director needs to provide clear guidance  
473 to the training faculty as to the types and frequencies of evaluations expected  
474 from them. Verbal feedback from a faculty member to the fellowship director  
475 regarding a trainee, either positive or negative, must be followed up with a written  
476 communication for the trainee's file.

477

478 Warning

479 When a trainee has been advised about deficiencies but fails to make sufficient  
480 improvement, he/she may be warned that continued lack of improvement may  
481 result in probation. This information must be provided to the trainee in person  
482 and in writing.

483

484 Probation

485 Clearly suboptimal academic and/or clinical performance may warrant probation.  
486 The action must be explained to the fellow in person and in writing. Expectations  
487 for improvement, the methods for evaluating improvement, the anticipated  
488 duration of probation, and possible future actions must be delineated. The trainee  
489 must be advised that his/her academic file is always available for review and that  
490 he/she may appeal the decision. The trainee should be offered counseling. A  
491 sample probationary letter is available from the FMIGS Board but is subject to  
492 local variation.

493

494 Non-reappointment/Termination

495 A trainee's failure to remediate suboptimal academic and/or clinical performance  
496 may warrant a decision not to reappoint the trainee at the end of the current

497 training year, or, in unusual circumstances, to terminate the contract immediately.  
498 The action must be explained to the fellow member in person and in writing. As  
499 with a probationary letter, the trainee must be advised that his/her academic file  
500 is always available for review and that he/she may appeal the decision. The trainee  
501 must be offered counseling. A sample non-reappointment or termination letter is  
502 available from the FMIGS Board but is subject to local variation.

503

504 Termination without an intervening period of probation should be reserved for a  
505 serious deviation from acceptable academic and clinical performance (e.g.,  
506 dereliction of duty) that endangers patient care.

507

### 508 **The Purpose of Disciplinary Actions**

509 The objective of academic discipline is remediation. Thus, the terms of probation  
510 should always be carefully devised to ensure that the trainee has the opportunity  
511 to attain the desired improvement and that methods for evaluating that  
512 improvement are robust and as objective as possible.

513

### 514 Timing issues

515 A probationary period must be long enough to permit a thorough evaluation of  
516 progress. Except in unusual circumstances, a period of at least 3-4 months is  
517 required. The date on which the trainee's status will be reconsidered should be  
518 picked in light of possible future actions, such as non-reappointment, so that  
519 ideally the trainee will have ample opportunity to find a different training program  
520 before the end of his/her training year. Alternatively, if a trainee's lack of progress  
521 requires a period of probation late in the training year, there should be  
522 consideration of extending the current training year until a decision regarding  
523 adequacy of remediation can be made.

524

### 525 **P. Accreditation of Fellowship Programs**

526 All new fellowship programs must apply to the FMIGS Board. Programs that have  
527 demonstrated compliance with the fellowship standards receive accreditation for  
528 one or more years.

529

530 Fellowship programs will be evaluated continuously on their compliance with the  
531 program requirements. If a program is found to have areas of non-compliance  
532 (deficiencies or areas of concern), the FMIGS Board will list these citations, and

533 expect the program to come into compliance in the time period designated.  
534 Based on the number, severity and/or persistence of these citations, a program  
535 may be given a warning, placed on probation or accreditation may be withdrawn.  
536 Fellowships on probation may not recruit for fellows and must notify the current  
537 fellows. Please see the FMIGS Accreditation and Review Policy on the website for  
538 more details.

539

540 If there are any significant or unexpected changes in the program or status of the  
541 fellow (e.g. change in the number of fellow positions, fellowship director, key  
542 faculty members, patient volume and procedures; changes in clinical sites or  
543 closure of major research programs), the FMIGS Board must be notified  
544 electronically within 30 days (fmigs@aagl.org).

545 **Q. *Fatigue Monitoring and Mitigation/Duty Hours***

546 The FMIGS Board requires that the ACGME Fatigue Mitigation and duty hour  
547 guidelines are followed. Detailed information can be accessed at:

548 <https://www.acgme.org/Portals/0/PFAssets/ProgramRequirements/CPRFellows>  
549 [hip2020.pdf](https://www.acgme.org/Portals/0/PFAssets/ProgramRequirements/CPRFellows)

550

551 Policies and procedures related to duty hours for fellows must be distributed to  
552 the fellows and faculty and the program must:

- 553 1. Monitor according to the program policy, with a frequency sufficient to  
554 ensure duty hour compliance
- 555 2. Ensure the provision of back up support systems for patient care
- 556 3. Educate core faculty members and fellows to recognize the signs of fatigue  
557 and sleep deprivation
- 558 4. Monitor the demands of day, night, OB (if applicable), moonlighting and/or  
559 at-home call and intervene as necessary to mitigate excessive service  
560 and/or fatigue

561 **R. *Stipend and Benefits***<sup>4</sup>

562 Fellows must be provided a stipend which must be at the minimum equivalent to  
 563 a PGY-5 or -6 housestaff officer in the geographic region of the program.  
 564 Candidates invited for an interview are to be informed, in writing or by electronic  
 565 means, of the terms, conditions, and benefits of their appointment, including  
 566 stipend and other financial support; vacations; parental, sick and other leaves of  
 567 absence.

568

569 The following benefits are required:

570 1. The fellowship must provide fellows with health, disability and professional  
 571 liability coverage at all sites and all pertinent information regarding this  
 572 coverage. Liability coverage must include legal defense and protection against  
 573 awards from claims reported or filed after the completion of the program(s) if  
 574 the alleged acts or omissions of the fellows are within the scope of the  
 575 program(s). Specify if liability coverage is provided for external  
 576 rotations/electives. Research associated costs (IRB, equipment, publication)  
 577 must be covered.

578 2. The program must provide time and support for:

- 579 1. Travel to the Global Congress of the AAGL  
 580 2. FMIGS Bootcamp  
 581 3. “live” attendance at the FMIGS webinars (i.e. > 75%)  
 582

583 It is the expectation that programs will not require their fellows to sign a non-  
 584 compete agreement or restrictive covenant. If the program does require a  
 585 restrictive covenant clause, they must notify both the FMIGS Board and notify (in  
 586 writing) all applicants before an initial interview is scheduled.

---

<sup>4</sup> *FMIGS-I Stipend and Benefits*

Prior to an interview, candidates invited for an interview are to be informed, in writing or by electronic means, of the terms, conditions, and benefits of their appointment, including possible stipend and other financial support; vacations; parental, sick and other leaves of absence. The FMIGS-I training program must ensure that irrespective of the rotation site, the fellow has the financial means to support themselves during training, will not be liable should a legal defense be required, has the means and support to perform research, has health insurance.

The program must inform the candidate about whether the following recommended benefits are provided travel to the Global Congress of the AAGL, Bootcamp and attendance at the FMIGS webinars.

587 **S. Application Process**

588 The FMIGS Board actively encourages applications from Obstetrician-Gynecologist  
589 physicians aspiring to develop their surgical skills in MIGS. Please see the website  
590 for details of the deadline dates. Application will be available online at the  
591 Fellowship webpage, [www.fmigs.org](http://www.fmigs.org).

592

593 Applications for programs interested in becoming a fellowship training site, are  
594 also available on the Fellowship webpage, [www.fmigs.org](http://www.fmigs.org), or by contacting the  
595 Fellowship Administrative Assistant at the Fellowship office.

596

597 **T. Match<sup>5</sup>**

598 The Fellowship match is conducted through an objective computer matching  
599 program (NRMP). Programs and applicants are required to use the match  
600 process. No candidate at any time can be offered a position outside the NRMP  
601 match without prior approval from the FMIGS Board. If a fellowship program  
602 intends to accept a specific candidate outside the match (e.g. graduating resident  
603 from their program), they must contact the FMIGS NRMP representative  
604 (<https://bit.ly/2UsP3qW>), obtain FMIGS Board approval for the match waiver and  
605 avoid subjecting other candidates to the unnecessary burdens of interviewing.

606

607 The match provides a uniform time for both applicants and fellowship programs  
608 to make selection decisions without coercion, undue or unwarranted pressure.  
609 Both applicants and fellowship programs may express their interest in each other;  
610 however, they shall not solicit verbal or written statements implying a  
611 commitment. Applicants shall at all times be free to keep confidential the names  
612 or identities of programs to which they have or may apply. Any violations will be  
613 addressed by the FMIGS Board and will be subject to consequences as determined  
614 by the FMIGS Board.

615

616 **U. Further Information**

617 For further inquiries, please contact the FMIGS Administrative Assistant:  
618 6757 Katella Avenue, Cypress, CA 90630-5105 USA.  
619 Ph: (800) 554-2245 or (714) 503-6200 • Fax: (714) 503-6202  
620 E-mail: [fmigs@aagl.org](mailto:fmigs@aagl.org) • Web Site: [www.aagl.org](http://www.aagl.org)

621

---

<sup>5</sup> Matching into an FMIGS-I program will take place after the NRMP match results have been released.

622

623

**V. Appendix 1: Competencies**

624

625

**1. Patient Care**

626

Fellows must be able to provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Fellows must demonstrate competence in:

627

628

629

A) Evaluating a patient's complaint, providing an accurate examination, employing appropriate diagnostic tests, arriving at a correct diagnosis, and recommending the appropriate treatment

630

631

632

B) The essential areas of benign gynecology including:

633

- normal physiology of reproductive tract

634

- gynecologic management during pregnancy

635

- gynecologic surgery and complications management

636

- management of critically ill patients

637

- gynecologic pathology

638

- the full range of commonly employed diagnostic procedures, including ultrasonography, Computed Tomographic (CT) Magnetic Resonance Imaging (MRI) and other relevant imaging techniques

639

640

641

642

**2. Medical Knowledge**

643

Fellows must demonstrate knowledge of established and evolving medical, clinical, epidemiological and social-behavioral sciences, as well as the application of this knowledge to patient care.

644

645

Fellows must demonstrate knowledge in:

646

647

A) Reproductive health care, diagnosis, management, consultation, and referral

648

649

B) The fundamentals of basic science as applied to MIGS

650

C) Applied surgical anatomy and pathology

651

D) Basics of risk-benefit analysis, epidemiology, statistics, data collection and management, and use of medical literature and assessment of its value

652

653

654

655

656

657

- 658           3. Practice-based Learning and Improvement
- 659           Fellows must demonstrate the ability to investigate and evaluate their care of
- 660           patients, to appraise and assimilate scientific evidence, and to continuously
- 661           improve patient care based on constant self-evaluation and life-long learning.
- 662           Fellows are expected to develop skills and habits to be able to meet the
- 663           following goals:
- 664           A) Identify strengths, deficiencies, and limits in one’s knowledge and
- 665           expertise
- 666           B) Set learning and improvement goals
- 667           C) Identify and perform appropriate learning activities
- 668           D) Systematically analyze practice using quality improvement methods, and
- 669           implement changes with the goal of practice improvement
- 670           E) Incorporate formative evaluation feedback into daily practice
- 671           F) Locate, appraise, and assimilate evidence from scientific studies related to
- 672           their patient’s health problems
- 673           G) Use information technology to optimize learning
- 674           H) Participate in the education of patients, families, students, residents and
- 675           other health professionals
- 676
- 677           4. Interpersonal and Communication Skills
- 678           Fellows must demonstrate interpersonal and communication skills that result
- 679           in the effective exchange of information and collaboration with patients, their
- 680           families, and health professionals.
- 681           Fellows are expected to:
- 682           A) Communicate effectively with patients, families, and the public, as
- 683           appropriate, across a broad range of socioeconomic and cultural
- 684           backgrounds
- 685           B) Communicate effectively with physicians, other health professionals,
- 686           and health related agencies
- 687           C) Work effectively as a member or leader of a health care team or other
- 688           professional group
- 689           D) Act in a consultative role to other physicians and health professionals;
- 690           E) Maintain comprehensive, timely, and legible medical records, if
- 691           applicable
- 692           F) Have the fundamentals of good medical history taking and thoughtful,
- 693           meticulous physical examination

694  
695  
696  
697  
698  
699  
700  
701  
702  
703  
704  
705  
706  
707  
708  
709  
710  
711  
712  
713  
714  
715  
716  
717  
718  
719  
720  
721  
722  
723  
724

5. Professionalism

Fellows must demonstrate a commitment to carrying out professional responsibilities and an adherence to ethical principles. Fellows are expected to demonstrate:

- A) Compassion, integrity, and respect for others
- B) Responsiveness to patient needs that supersedes self-interest
- C) Respect for patient privacy and autonomy
- D) Accountability to patients, society and the profession
- E) Sensitivity and responsiveness to a diverse patient population, including but not limited to diversity in gender, age, culture, race, religion, disabilities, and sexual orientation
- F) Ethics and medical jurisprudence

6. Systems-based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, as well as the ability to call effectively on other resources in the system to provide optimal health care.

Fellows are expected to:

- A) Work effectively in various health care delivery settings and systems relevant to their clinical specialty
- B) Coordinate patient care within the health care system relevant to their clinical specialty
- C) Incorporate considerations of cost awareness and risk-benefit analysis in patient and/or population-based care as appropriate
- D) Advocate for quality patient care and optimal patient care systems
- E) Work in inter-professional teams to enhance patient safety and improve patient care quality
- F) Participate in identifying system errors and implementing potential systems solutions
